Methodology

FOR ASSESSING COMPLIANCE WITH THE FATF RECOMMENDATIONS AND THE EFFECTIVENESS OF AML/CFT SYSTEMS

February 2013
The Financial Action Task Force (FATF) is an independent inter-governmental body that develops and promotes policies to protect the global financial system against money laundering, terrorist financing and the financing of proliferation of weapons of mass destruction. The FATF Recommendations are recognised as the global anti-money laundering (AML) and counter-terrorist financing (CFT) standard.

For more information about the FATF, please visit the website:

INTRODUCTION

1. This document provides the basis for undertaking assessments of technical compliance with the revised FATF Recommendations, adopted in February 2012, and for reviewing the level of effectiveness of a country’s Anti-Money Laundering / Countering the Financing of Terrorism (AML/CFT) system. It consists of three sections. This first section is an introduction, giving an overview of the assessment Methodology, its background, and how it will be used in evaluations/assessments. The second section sets out the criteria for assessing technical compliance with each of the FATF Recommendations. The third section sets out the outcomes, indicators, data and other factors used to assess the effectiveness of the implementation of the FATF Recommendations. The processes and procedures for Mutual Evaluations are set out in a separate document.

2. For its 4th round of mutual evaluations, the FATF has adopted complementary approaches for assessing technical compliance with the FATF Recommendations, and for assessing whether and how the AML/CFT system is effective. Therefore, the Methodology comprises two components:
   - The technical compliance assessment addresses the specific requirements of the FATF Recommendations, principally as they relate to the relevant legal and institutional framework of the country, and the powers and procedures of the competent authorities. These represent the fundamental building blocks of an AML/CFT system.
   - The effectiveness assessment differs fundamentally from the assessment of technical compliance. It seeks to assess the adequacy of the implementation of the FATF Recommendations, and identifies the extent to which a country achieves a defined set of outcomes that are central to a robust AML/CFT system. The focus of the effectiveness assessment is therefore on the extent to which the legal and institutional framework is producing the expected results.

3. Together, the assessments of both technical compliance and effectiveness will present an integrated analysis of the extent to which the country is compliant with the FATF Standards and how successful it is in maintaining a strong AML/CFT system, as required by the FATF Recommendations.

4. This Methodology is designed to assist assessors when they are conducting an assessment of a country’s compliance with the international AML/CFT standards. It reflects the requirements set out in the FATF Recommendations and Interpretive Notes, which constitute the international standard to combat money laundering and the financing of terrorism and proliferation, but does not amend or override them. It will assist assessors in identifying the systems and mechanisms developed by

---

1 The terms “assessment”, “evaluation” and their derivatives are used throughout this document, and refer to both mutual evaluations undertaken by the FATF and FSRBs and third-party assessments (i.e. assessments undertaken by the IMF and World Bank).
countries with diverse legal, regulatory and financial frameworks in order to implement effective AML/CFT systems; and is also useful for countries that are reviewing their own systems, including in relation to technical assistance needs. This Methodology is also informed by the experience of the FATF, the FATF-style regional bodies (FSRBs), the International Monetary Fund and the World Bank in conducting assessments of compliance with earlier versions of the FATF Recommendations.

RISK AND CONTEXT

5. The starting point for every assessment is the assessors’ initial understanding of the country’s risks and context, in the widest sense, and elements which contribute to them. This includes:
   - the nature and extent of the money laundering and terrorist financing risks;
   - the circumstances of the country, which affect the *materiality* of different Recommendations (e.g., the makeup of its economy and its financial sector);
   - *structural elements* which underpin the AML/CFT system; and
   - *other contextual factors* which could influence the way AML/CFT measures are implemented and how effective they are.

6. The ML/TF risks are critically relevant to evaluating technical compliance with Recommendation 1 and the risk-based elements of other Recommendations, and to assess effectiveness. Assessors should consider the nature and extent of the money laundering and terrorist financing risk factors to the country at the outset of the assessment, and throughout the assessment process. Relevant factors can include the level and type of proceeds-generating crime in the country; the terrorist groups active or raising funds in the country; exposure to cross-border flows of criminal or illicit assets.

7. Assessors should use the country’s own assessment(s) of its risks as an initial basis for understanding the risks, but should not uncritically accept a country's risk assessment as correct, and need not follow all its conclusions. Assessors should also note the guidance in paragraph 15, below on how to evaluate risk assessments in the context of Recommendation 1 and Immediate Outcome 1. There may be cases where assessors cannot conclude that the country’s assessment is reasonable, or where the country’s assessment is insufficient or non-existent. In such situations, they should consult closely with the national authorities to try to reach a common understanding of what are the key risks within the jurisdiction. If there is no agreement, or if they cannot conclude that the country’s assessment is reasonable, then assessors should clearly explain any differences of understanding, and their reasoning on these, in the Mutual Evaluation Report (MER); and should use their understanding of the risks as a basis for assessing the other risk-based elements (e.g. risk-based supervision).

8. Assessors should also consider issues of *materiality*, including, for example, the relative importance of different parts of the financial sector and different DNFBPs; the size, integration and make-up of the financial sector; the relative importance of different types of financial products or institutions; the amount of business which is domestic or cross-border; the extent to which the economy is cash-based; and estimates of the size of the informal sector and/or shadow economy. Assessors should also be aware of population size, the country’s level of development, geographical
factors, and trading or cultural links. Assessors should consider the relative importance of different sectors and issues in the assessment of both technical compliance and of effectiveness. The most important and relevant issues to the country should be given more weight when determining ratings for technical compliance, and more attention should be given to the most important areas when assessing effectiveness, as set out below.

9. An effective AML/CFT system normally requires certain structural elements to be in place, for example: political stability; a high-level commitment to address AML/CFT issues; stable institutions with accountability, integrity, and transparency; the rule of law; and a capable, independent and efficient judicial system. The lack of such structural elements, or significant weaknesses and shortcomings in the general framework, may significantly hinder the implementation of an effective AML/CFT framework; and, where assessors identify a lack of compliance or effectiveness, missing structural elements may be a reason for this and should be identified in the MER, where relevant.

10. Other contextual factors that might significantly influence the effectiveness of a country's AML/CFT measures include the maturity and sophistication of the regulatory and supervisory regime in the country; the level of corruption and the impact of measures to combat corruption; or the level of financial exclusion. Such factors may affect the ML/FT risks and increase or reduce the effectiveness of AML/CFT measures.

11. Assessors should consider the contextual factors above, including the risks, issues of materiality, structural elements, and other contextual factors, to reach a general understanding of the context in which the country's AML/CFT system operates. These factors may influence which issues assessors consider to be material or higher-risk, and consequently will help assessors determine where to focus their attention in the course of an assessment. Some particularly relevant contextual factors are noted in the context of individual immediate outcomes addressed in the effectiveness component of this Methodology. Assessors should be cautious regarding the information used when considering how these risk and contextual factors might affect a country's evaluation, particularly in cases where they materially affect the conclusions. Assessors should take the country's views into account, but should review them critically, and should also refer to other credible or reliable sources of information (e.g. from international institutions or major authoritative publications), preferably using multiple sources. Based on these elements the assessors should make their own judgement of the context in which the country's AML/CFT system operates, and should make this analysis clear and explicit in the MER.

12. Risk, materiality, and structural or contextual factors may in some cases explain why a country is compliant or non-compliant, or why a country's level of effectiveness is higher or lower than might be expected, on the basis of the country's level of technical compliance. These factors may be an important part of the explanation why the country is performing well or poorly, and an important element of assessors' recommendations about how effectiveness can be improved. Ratings of both technical compliance and effectiveness are judged on a universal standard applied to all countries. An unfavourable context (e.g., where there are missing structural elements), may undermine compliance and effectiveness. However, risks and materiality, and structural or other contextual factors should not be an excuse for poor or uneven implementation of the FATF
standards. Assessors should make clear in the MER which factors they have taken into account; why and how they have done so, and the information sources used when considering them.

GENERAL INTERPRETATION AND GUIDANCE

13. A full set of definitions from the FATF Recommendations are included in the Glossary which accompanies the Recommendations. Assessors should also take note of the following guidance on other points of general interpretation, which is important to ensure consistency of approach.

14. Financial Institutions – Assessors should have a thorough understanding of the types of entities that engage in the financial activities referred to in the glossary definition of financial institutions. It is important to note that such activities may be undertaken by institutions with different generic names (e.g., “bank”) in different countries, and that assessors should focus on the activity, not the names attached to the institutions.

15. Evaluating the country’s Assessment of risk – Assessors are not expected to conduct an independent risk assessment of their own when assessing Recommendation 1 and Immediate Outcome 1, but on the other hand should not necessarily accept a country’s risk assessment as correct. In reviewing the country’s risk assessment, assessors should consider the rigour of the processes and procedures employed; and the internal consistency of the assessment (i.e. whether the conclusions are reasonable given the information and analysis used). Assessors should focus on high-level issues, not fine details, and should take a common-sense approach to whether the results are reasonable. Where relevant and appropriate, assessors should also consider other credible or reliable sources of information on the country’s risks, in order to identify whether there might be any material differences that should be explored further. Where the assessment team considers the country’s assessment of the risks to be reasonable the risk-based elements of the Methodology could be considered on the basis of it.

16. When assessing Recommendation 1, assessors should concentrate their analysis on the following elements: (1) processes and mechanisms in place to produce and coordinate the risk assessment(s); (2) the reasonableness of the risk assessment(s); and, (3) the alignment of risk-based measures with the risks identified (e.g., exemptions, higher or lower risks situations).

17. When assessing Immediate Outcome 1, assessors, based on their views of the reasonableness of the assessment(s) of risks, should focus on how well the competent authorities use their understanding of the risks in practice to inform policy development and activities to mitigate the risks.

18. Risk-based requirements – For each Recommendation where financial institutions and Designated Non-Financial Businesses or Professions (DNFBPs) should be required to take certain actions, assessors should normally assess compliance on the basis that all financial institutions and DNFBPs should have to meet all the specified requirements. However, an important consideration underlying the FATF Recommendations is the degree of risk of money laundering or terrorist financing for particular types of institutions, businesses or professions, or for particular customers, products, transactions, or countries. A country may, therefore, take risk into account in the application of the Recommendations (e.g., in the application of simplified measures), and assessors
will need to take the risks, and the flexibility allowed by the risk-based approach, into account when determining whether there are deficiencies in a country's preventive measures, and their importance. Where the FATF Recommendations identify higher risk activities for which enhanced or specific measures are required, all such measures must be applied, although the extent of such measures may vary according to the specific level of risk.

19. Exemptions for low-risk situations – Where there is a low risk of money laundering and terrorist financing, countries may decide not to apply some of the Recommendations requiring financial institutions and DNFBPs to take certain actions. In such cases, countries should provide assessors with the evidence and analysis which was the basis for the decision not to apply the Recommendations.

20. Requirements for financial institutions, DNFBPs, and countries - The FATF Recommendations state that financial institutions or DNFBPs “should” or “should be required to” take certain actions, or that countries “should ensure” that certain actions are taken by financial institutions, DNFBPs or other entities or persons. In order to use one consistent phrase, the relevant criteria in this Methodology use the phrase “Financial institutions (or DNFBPs) should be required”.

21. Law or enforceable means – The note on the Legal basis of requirements on financial institutions and DNFBPs (at the end of the Interpretive Notes to the FATF Recommendations) sets out the required legal basis for enacting the relevant requirements. Assessors should consider whether the mechanisms used to implement a given requirement qualify as an enforceable means on the basis set out in that note. Assessors should be aware that Recommendations 10, 11, and 20 contain requirements which must be set out in law, while other requirements may be set out in either law or enforceable means. It is possible that types of documents or measures which are not considered to be enforceable means may nevertheless help contribute to effectiveness, and may, therefore, be considered in the context of effectiveness analysis, without counting towards meeting requirements of technical compliance (e.g., voluntary codes of conduct issued by private sector bodies or non-binding guidance by a supervisory authority).

22. Assessment for DNFBPs – Under Recommendations 22, 23 and 28 (and specific elements of Recommendations 6 and 7), DNFBPs and the relevant supervisory (or self-regulatory) bodies are required to take certain actions. Technical compliance with these requirements should only be assessed under these specific Recommendations and should not be carried forward into other Recommendations relating to financial institutions. However, the assessment of effectiveness should take account of both financial institutions and DNFBPs when examining the relevant outcomes.

23. Financing of Proliferation – The requirements of the FATF Standard relating to the financing of proliferation are limited to Recommendation 7 (“Targeted Financial Sanctions”) and Recommendation 2 (“National Co-operation and Co-ordination”). In the context of the effectiveness assessment, all requirements relating to the financing of proliferation are included within Outcome 11, except those on national co-operation and co-ordination, which are included in Immediate Outcome 1. Issues relating to the financing of proliferation should be considered in those places only, and not in other parts of the assessment.

24. National, supra-national and sub-national measures - In some countries, AML/CFT issues are addressed not just at the level of the national government, but also at state/province or local
levels. When assessments are being conducted, appropriate steps should be taken to ensure that AML/CFT measures at the state/provincial level are also adequately considered. Equally, assessors should take into account and refer to supra-national laws or regulations that apply to a country. Annex I sets out the specific Recommendations that may be assessed on a supra-national basis.

25. **Financial Supervision** – Laws and enforceable means that impose preventive AML/CFT requirements upon the banking, insurance, and securities sectors should be implemented and enforced through the supervisory process. In these sectors, the relevant core supervisory principles issued by the Basel Committee, IAIS, and IOSCO should also be adhered to. For certain issues, these supervisory principles will overlap with or be complementary to the requirements set out in the FATF standards. Assessors should be aware of, and have regard to, any assessments or findings made with respect to the Core Principles, or to other relevant principles or standards issued by the supervisory standard-setting bodies. For other types of financial institutions, it will vary from country to country as to whether these laws and obligations are implemented and enforced through a regulatory or supervisory framework, or by other means.

26. **Sanctions** – Several Recommendations require countries to have “effective, proportionate, and dissuasive sanctions” for failure to comply with AML/CFT requirements. Different elements of these requirements are assessed in the context of technical compliance and of effectiveness. In the technical compliance assessment, assessors should consider whether the country’s framework of laws and enforceable means includes a sufficient range of sanctions that they can be applied proportionately to greater or lesser breaches of the requirements. In the effectiveness assessment, assessors should consider whether the sanctions applied in practice are effective at ensuring future compliance by the sanctioned institution; and dissuasive of non-compliance by others.

27. **International Co-operation** – In this Methodology, international co-operation is assessed in specific Recommendations and Immediate Outcomes (principally Recommendations 36-40 and Immediate Outcome 2). Assessors should also be aware of the impact that a country’s ability and willingness to engage in international co-operation may have on other Recommendations and Immediate Outcomes (e.g., on the investigation of crimes with a cross-border element or the supervision of international groups), and set out clearly any instances where compliance or effectiveness is positively or negatively affected by international co-operation.

28. **Draft legislation and proposals** – Assessors should only take into account relevant laws, regulations or other AML/CFT measures that are in force and effect by the end of the on-site visit to the country. Where bills or other specific proposals to amend the system are made available to assessors, these may be referred to in the report, but should not be taken into account in the conclusions of the assessment or for ratings purposes.

---

2 Examples of types of sanctions include: written warnings; orders to comply with specific instructions (possibly accompanied with daily fines for non-compliance); ordering regular reports from the institution on the measures it is taking; fines for non-compliance; barring individuals from employment within that sector; replacing or restricting the powers of managers, directors, and controlling owners; imposing conservatorship or suspension or withdrawal of the license; or criminal penalties where permitted.
29. **FATF Guidance** - assessors may also consider FATF Guidance as background information on how countries can implement specific requirements. A full list of FATF Guidance is included as an annex to this document. Such guidance may help assessors understand the practicalities of implementing the FATF Recommendations, but the application of the guidance should not form part of the assessment.
30. The technical compliance component of the Methodology refers to the implementation of the specific requirements of the FATF Recommendations, including the framework of laws and enforceable means; and the existence, powers and procedures of competent authorities. For the most part, it does not include the specific requirements of the standards that relate principally to effectiveness. These are assessed separately, through the effectiveness component of the Methodology.

31. The FATF Recommendations, being the recognised international standards, are applicable to all countries. However, assessors should be aware that the legislative, institutional and supervisory framework for AML/CFT may differ from one country to the next. Provided the FATF Recommendations are complied with, countries are entitled to implement the FATF Standards\(^3\) in a manner consistent with their national legislative and institutional systems, even though the methods by which compliance is achieved may differ. In this regard, assessors should be aware of the risks, and the structural or contextual factors for the country.

32. The technical compliance component of the Methodology sets out the specific requirements of each Recommendation as a list of criteria, which represent those elements that should be present in order to demonstrate full compliance with the mandatory elements of the Recommendations. Criteria to be assessed are numbered sequentially for each Recommendation, but the sequence of criteria does not represent any priority or order of importance. In some cases, elaboration (indented below the criteria) is provided in order to assist in identifying important aspects of the assessment of the criteria. For criteria with such elaboration, assessors should review whether each of the elements is present, in order to judge whether the criterion as a whole is met.

COMPLIANCE RATINGS

33. For each Recommendation assessors should reach a conclusion about the extent to which a country complies (or not) with the standard. There are four possible levels of compliance: compliant, largely compliant, partially compliant, and non-compliant. In exceptional circumstances, a Recommendation may also be rated as not applicable. These ratings are based only on the criteria specified in the technical compliance assessment, and are as follows:

---
\(^3\) The FATF Standards comprise the FATF Recommendations and their Interpretive Notes.
**Technical compliance ratings**

<table>
<thead>
<tr>
<th>Compliance Level</th>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Compliant</td>
<td>C</td>
<td>There are no shortcomings.</td>
</tr>
<tr>
<td>Largely compliant</td>
<td>LC</td>
<td>There are only minor shortcomings.</td>
</tr>
<tr>
<td>Partially compliant</td>
<td>PC</td>
<td>There are moderate shortcomings.</td>
</tr>
<tr>
<td>Non-compliant</td>
<td>NC</td>
<td>There are major shortcomings.</td>
</tr>
<tr>
<td>Not applicable</td>
<td>NA</td>
<td>A requirement does not apply, due to the structural, legal or institutional features of a country.</td>
</tr>
</tbody>
</table>

When deciding on the level of shortcomings for any Recommendation, assessors should consider, having regard to the country context, the number and the relative importance of the criteria met or not met.

34. It is essential to note that it is the responsibility of the assessed country to demonstrate that its AML/CFT system is compliant with the Recommendations. In determining the level of compliance for each Recommendation, the assessor should not only assess whether laws and enforceable means are compliant with the FATF Recommendations, but should also assess whether the institutional framework is in place.

35. **Weighting** – The individual criteria used to assess each Recommendation do not all have equal importance, and the number of criteria met is not always an indication of the overall level of compliance with each Recommendation. When deciding on the rating for each Recommendation, assessors should consider the relative importance of the criteria in the context of the country. Assessors should consider how significant any deficiencies are given the country’s risk profile and other structural and contextual information (e.g., for a higher risk area or a large part of the financial sector). In some cases a single deficiency may be sufficiently important to justify an NC rating, even if other criteria are met. Conversely a deficiency in relation to a low risk or little used types of financial activity may have only a minor effect on the overall rating for a Recommendation.

36. **Overlaps between Recommendations** – In many cases the same underlying deficiency will have a cascading effect on the assessment of several different Recommendations. For example: a deficient risk assessment could undermine risk-based measures throughout the AML/CFT system; or a failure to apply AML/CFT regulations to a particular type of financial institution or DNFBP could affect the assessment of all Recommendations which apply to financial institutions or DNFBPs. When considering ratings in such cases, assessors should reflect the deficiency in the factors underlying the rating for each applicable Recommendation, and, if appropriate, mark the rating accordingly. They should also clearly indicate in the MER that the same underlying cause is involved in all relevant Recommendations.
37. **Comparison with previous ratings** - Due to the revision and consolidation of the FATF Recommendations and Special Recommendations in 2012, and the introduction of separate assessments for technical compliance and effectiveness, the ratings given under this Methodology will not be directly comparable with ratings given under the 2004 Methodology.
38. The assessment of the effectiveness of a country's AML/CFT system is equally as important as the assessment of technical compliance with the FATF standards. Assessing effectiveness is intended to: (a) improve the FATF’s focus on outcomes; (b) identify the extent to which the national AML/CFT system is achieving the objectives of the FATF standards, and identify any systemic weaknesses; and (c) enable countries to prioritise measures to improve their system. For the purposes of this Methodology, effectiveness is defined as "The extent to which the defined outcomes are achieved".

39. In the AML/CFT context, effectiveness is the extent to which financial systems and economies mitigate the risks and threats of money laundering, and financing of terrorism and proliferation. This could be in relation to the intended result of a given (a) policy, law, or enforceable means; (b) programme of law enforcement, supervision, or intelligence activity; or (c) implementation of a specific set of measures to mitigate the money laundering and financing of terrorism risks, and combat the financing of proliferation.

40. The goal of an assessment of effectiveness is to provide an appreciation of the whole of the country’s AML/CFT system and how well it works. Assessing effectiveness is based on a fundamentally different approach to assessing technical compliance with the Recommendations. It does not involve checking whether specific requirements are met, or that all elements of a given Recommendation are in place. Instead, it requires a judgement as to whether, or to what extent defined outcomes are being achieved, *i.e.* whether the key objectives of an AML/CFT system, in line with the FATF Standards, are being effectively met in practice. The assessment process is reliant on the judgement of assessors, who will work in consultation with the assessed country.

41. It is essential to note that it is the responsibility of the assessed country to demonstrate that its AML/CFT system is effective. If the evidence is not made available, assessors can only conclude that the system is not effective.

**THE FRAMEWORK FOR ASSESSING EFFECTIVENESS**

42. For its assessment of effectiveness, the FATF has adopted an approach focusing on a hierarchy of defined outcomes. At the highest level, the objective in implementing AML/CFT measures is that "Financial systems and the broader economy are protected from the threats of money laundering and the financing of terrorism and proliferation, thereby strengthening financial sector integrity and contributing to safety and security". In order to give the right balance between an overall understanding of the effectiveness of a country's AML/CFT system, and a detailed appreciation of how well its component parts are operating, the FATF assesses effectiveness primarily on the basis of eleven Immediate Outcomes. Each of these represents one of the key goals which an effective AML/CFT system should achieve, and they feed into three Intermediate Outcomes which represent the major thematic goals of AML/CFT measures. This approach does not seek to assess directly the effectiveness with which a country is implementing individual Recommendations; or the performance of specific organisations, or institutions. Assessors are not expected to evaluate directly
the High-Level Objective or Intermediate Outcomes, though these could be relevant when preparing the written MER and summarising the country’s overall effectiveness in general terms.

43. The relation between the High-Level Objective, the Intermediate Outcomes, and the Immediate Outcomes, is set out in the diagram below:

**High-Level Objective:**
Financial systems and the broader economy are protected from the threats of money laundering and the financing of terrorism and proliferation, thereby strengthening financial sector integrity and contributing to safety and security.

**Intermediate Outcomes:**

1. Money laundering and terrorist financing risks are understood and, where appropriate, actions coordinated domestically to combat money laundering and the financing of terrorism and proliferation.
2. Supervisors appropriately supervise, monitor and regulate financial institutions and DNFBPs for compliance with AML/CFT requirements commensurate with their risks.
3. Legal persons and arrangements are prevented from misuse for money laundering or terrorist financing, and information on their beneficial ownership is available to competent authorities without impediments.
4. Proceeds of crime and funds in support of terrorism are prevented from entering the financial and other sectors or are detected and reported by these sectors.
5. Money laundering threats are detected and disrupted, and criminals are sanctioned and deprived of illicit proceeds. Terrorist financing threats are detected and disrupted, terrorists are deprived of resources, and those who finance terrorism are sanctioned, thereby contributing to the prevention of terrorist acts.
6. Policy, coordination and cooperation mitigate the money laundering and financing of terrorism risks.
7. International cooperation delivers appropriate information, financial intelligence, and evidence, and facilitates action against criminals and their assets.
8. Money laundering and terrorist financing risks are understood and, where appropriate, actions coordinated domestically to combat money laundering and the financing of terrorism and proliferation.
9. Supervisors appropriately supervise, monitor and regulate financial institutions and DNFBPs for compliance with AML/CFT requirements commensurate with their risks.
10. International cooperation delivers appropriate information, financial intelligence, and evidence, and facilitates action against criminals and their assets.
11. Legal persons and arrangements are prevented from misuse for money laundering or terrorist financing, and information on their beneficial ownership is available to competent authorities without impediments.
12. Money laundering threats are detected and disrupted, and criminals are sanctioned and deprived of illicit proceeds. Terrorist financing threats are detected and disrupted, terrorists are deprived of resources, and those who finance terrorism are sanctioned, thereby contributing to the prevention of terrorist acts.
13. International cooperation delivers appropriate information, financial intelligence, and evidence, and facilitates action against criminals and their assets.
14. Legal persons and arrangements are prevented from misuse for money laundering or terrorist financing, and information on their beneficial ownership is available to competent authorities without impediments.
15. Money laundering threats are detected and disrupted, and criminals are sanctioned and deprived of illicit proceeds. Terrorist financing threats are detected and disrupted, terrorists are deprived of resources, and those who finance terrorism are sanctioned, thereby contributing to the prevention of terrorist acts.

**Immediate Outcomes:**

1. Money laundering and terrorist financing risks are understood and, where appropriate, actions coordinated domestically to combat money laundering and the financing of terrorism and proliferation.
2. Supervisors appropriately supervise, monitor and regulate financial institutions and DNFBPs for compliance with AML/CFT requirements commensurate with their risks.
3. Legal persons and arrangements are prevented from misuse for money laundering or terrorist financing, and information on their beneficial ownership is available to competent authorities without impediments.
4. Proceeds of crime and funds in support of terrorism are prevented from entering the financial and other sectors or are detected and reported by these sectors.
5. Money laundering threats are detected and disrupted, and criminals are sanctioned and deprived of illicit proceeds. Terrorist financing threats are detected and disrupted, terrorists are deprived of resources, and those who finance terrorism are sanctioned, thereby contributing to the prevention of terrorist acts.
6. Policy, coordination and cooperation mitigate the money laundering and financing of terrorism risks.
7. International cooperation delivers appropriate information, financial intelligence, and evidence, and facilitates action against criminals and their assets.
8. Money laundering and terrorist financing risks are understood and, where appropriate, actions coordinated domestically to combat money laundering and the financing of terrorism and proliferation.
9. Supervisors appropriately supervise, monitor and regulate financial institutions and DNFBPs for compliance with AML/CFT requirements commensurate with their risks.
10. International cooperation delivers appropriate information, financial intelligence, and evidence, and facilitates action against criminals and their assets.
11. Legal persons and arrangements are prevented from misuse for money laundering or terrorist financing, and information on their beneficial ownership is available to competent authorities without impediments.
12. Money laundering threats are detected and disrupted, and criminals are sanctioned and deprived of illicit proceeds. Terrorist financing threats are detected and disrupted, terrorists are deprived of resources, and those who finance terrorism are sanctioned, thereby contributing to the prevention of terrorist acts.
SCOPING

44. Assessors must assess all eleven of the Immediate Outcomes. However, prior to the on-site visit, assessors should conduct a scoping exercise, in consultation with the assessed country, which should take account of the risks and other factors set out in paragraphs 5 to 10 above. Assessors should, in consultation with the assessed country, identify the higher risk issues, which should be examined in more detail in the course of the assessment and reflected in the final report. They should also seek to identify areas of lower/low risk, which may not need to be examined in the same level of detail. As the assessment continues, assessors should continue to engage the country and review their scoping based on their initial findings about effectiveness, with a view to focusing their attention on the areas where there is greatest scope to improve effectiveness in addressing the key ML/TF risks.

LINKS TO TECHNICAL COMPLIANCE

45. The country’s level of technical compliance contributes to the assessment of effectiveness. Assessors should consider the level of technical compliance as part of their scoping exercise. The assessment of technical compliance reviews whether the legal and institutional foundations of an effective AML/CFT system are present. It is unlikely that a country that is assessed to have a low level of compliance with the technical aspects of the FATF Recommendations will have an effective AML/CFT system (though it cannot be taken for granted that a technically compliant country will also be effective). In many cases, the main reason for poor effectiveness will be serious deficiencies in implementing the technical elements of the Recommendations.

46. In the course of assessing effectiveness, assessors should also consider the impact of technical compliance with the relevant Recommendations when explaining why the country is (or is not) effective and making recommendations to improve effectiveness. There may in exceptional circumstances be situations in which assessors conclude that there is a low level of technical compliance but nevertheless a certain level of effectiveness (e.g., as a result of specific country circumstances, including low risks or other structural, material or contextual factors; particularities of the country’s laws and institutions; or if the country applies compensatory AML/CFT measures which are not required by the FATF Recommendations). Assessors should pay particular attention to such cases in the MER, and must fully justify their decision, explaining in detail the basis and the specific reasons for their conclusions on effectiveness, despite lower levels of technical compliance.

USING THE EFFECTIVENESS METHODOLOGY

47. An assessment of effectiveness should consider each of the eleven Immediate Outcomes individually, but does not directly focus on the Intermediate or High-Level Outcomes. For each of the Immediate Outcomes, there are two overarching questions which assessors should try to answer:

- **To what extent is the outcome being achieved?** Assessors should assess whether the country is effective in relation to that outcome (i.e. whether the country is achieving the results expected of a well-performing AML/CFT system). They should base their conclusions principally on the Core Issues,
supported by the examples of information and the examples of specific factors; and taking into account the level of technical compliance, and contextual factors.

**What can be done to improve effectiveness?** Assessors should understand the reasons why the country may not have reached a high level of effectiveness and, where possible, make recommendations to improve its ability to achieve the specific outcome. They should base their analysis and recommendations on their consideration of the core issues and on the examples of specific factors that could support the conclusions on core issues, including activities, processes, resources and infrastructure. They should also consider the effect of technical deficiencies on effectiveness, and the relevance of contextual factors. If assessors are satisfied that the outcome is being achieved to a high degree, they would not need to consider in detail what can be done to improve effectiveness (though there may still be value in identifying good practices or potential further improvements, or ongoing efforts needed to sustain a high level of effectiveness).

*Characteristics of an Effective System*

48. The boxed text at the top of each of the Immediate Outcomes describes the main features and outcomes of an effective system. This sets out the situation in which a country is effective at achieving the outcome, and provides the benchmark for the assessment.

*Core Issues to be considered in determining whether the Outcome is being achieved*

49. The second section sets out the basis for assessors to judge if, and to what extent, the outcome is being achieved. The core issues are the mandatory questions which assessors should seek to answer, in order to get an overview about how effective a country is under each outcome. Assessors’ conclusions about how effective a country is should be based on an overview of each outcome, informed by the assessment of the core issues.

50. Assessors should examine all the core issues listed for each outcome. However, they may vary the degree of detail with which they examine each in order to reflect the degree of risk and materiality associated with that issue in the country. In exceptional circumstances, assessors may also consider additional issues which they consider, in the specific circumstances, to be core to the effectiveness outcome (e.g., alternative measures which reflect the specificities of the country’s AML/CFT system, but which are not included in the core issues or as additional information or specific factors). They should make clear when, and why, any additional issues have been used which are considered to be core.

*Examples of information that could support the conclusions on Core Issues*

51. The Examples of Information sets out the types and sources of information which are most relevant to understanding the extent to which the outcome is achieved, including particular data
points which assessors might look for when assessing the core issues. The supporting information and other data can test or validate assessors’ understanding of the core issues, and can provide a quantitative element to complete the assessors’ picture of how well the outcome is achieved.

52. The supporting information and data listed are not exhaustive and not mandatory. The data, statistics, and other material which are available will vary considerably from country to country, and assessors should make use of whatever information the country can provide in order to assist in reaching their judgement.

53. Assessment of effectiveness is not a statistical exercise. Assessors should use data and statistics, as well as other qualitative information, when reaching an informed judgement about how well the outcome is being achieved, but should interpret the available data critically, in the context of the country’s circumstances. The focus should not be on raw data (which can be interpreted in a wide variety of ways and even with contradictory conclusions), but on information and analysis which indicates, in the context of the country being assessed, whether the objective is achieved. Assessors should be particularly cautious about using data relating to other countries as a comparison point in judging effectiveness, given the significant differences in country circumstances, AML/CFT systems, and data collection practices. Assessors should also be aware that a high level of outputs does not always contribute positively towards achieving the desired outcome.

Examples of specific factors that could support the conclusions on core issues

54. The factors section of the Methodology sets out examples of the elements which are normally involved in delivering each outcome. These are not an exhaustive list of the possible factors, but are provided as an aid to assessors when considering the reasons why a country may (or may not) be achieving a particular outcome (e.g., through a breakdown in one of the factors). In most cases, assessors will need to refer to the factors in order to reach a firm conclusion about the extent to which a particular outcome is being achieved. It should be noted that the activities and processes listed in this section do not imply a single mandatory model for organising AML/CFT functions, but only represent the most commonly implemented administrative arrangements, and that the reasons why a country may not be effective are not limited to the factors listed. It should be noted that assessors need to focus on the qualitative aspects of these factors, not on the mere underlying process or procedure.

55. Assessors are not required to review all the factors in every case. When a country is demonstrably effective in an area, assessors should set out succinctly why this is the case, and highlight any areas of particular good practice, but they do not need to examine every individual factor in this section of the Methodology. There may also be cases in which a country is demonstrably not effective and where the reasons for this are fundamental (e.g., where there are major technical deficiencies). In such cases, there is also no need for assessors to undertake further detailed examination of why the outcome is not being achieved.

56. Assessors should be aware of outcomes which depend on a sequence of different steps, or a value-chain to achieve the outcome (e.g., Immediate Outcome 7, which includes investigation, prosecution and sanctioning in order). In these cases, it is possible that an outcome may not be
achieved because of a failure at one stage of the process, even though the other stages are themselves effective.

57. Assessors should also consider contextual factors, which may influence the issues assessors consider to be material or higher risk, and consequently, where they focus their attention. These factors may be an important part of the explanation why the country is performing well or poorly, and an important element of assessors’ recommendations about how effectiveness can be improved. However, they should not be an excuse for poor or uneven implementation of the FATF standards.

CROSS-CUTTING ISSUES

58. The Immediate Outcomes are not independent of each other. In many cases an issue considered specifically under one Immediate Outcome will also contribute to the achievement of other outcomes. In particular, the factors assessed under Immediate Outcomes 1 and 2, which consider (a) the country’s assessment of risks and implementation of the risk-based approach; and (b) its engagement in international co-operation, may have far-reaching effects on other outcomes (e.g., risk assessment affects the application of risk-based measures under Immediate Outcome 4, and the deployment of competent authorities’ resources relative to all outcomes; international co-operation includes seeking co-operation to support domestic ML investigations and confiscation proceedings under Immediate Outcomes 7 and 8). Therefore, assessors should take into consideration how their findings for Immediate Outcomes 1 and 2 may have a positive or negative impact on the level of effectiveness for other Immediate Outcomes. These cross-cutting issues are reflected in the notes to assessors under each Immediate Outcome.

CONCLUSIONS ON EFFECTIVENESS

59. For each individual Immediate Outcome, assessors should reach conclusions about the extent to which a country is (or is not) effective. In cases where the country has not reached a high level of effectiveness, assessors should also make recommendations about the reasons why this is the case, and the measures which the country should take to improve its ability to achieve the outcome.

60. **Effectiveness is assessed in a fundamentally different way to technical compliance.** Assessors’ conclusions about the extent to which a country is more or less effective should be based on an overall understanding of the degree to which the country is achieving the outcome. The Core Issues should not be considered as a checklist of criteria, but as a set of questions which help assessors achieve an appropriate understanding of the country’s effectiveness for each of the Immediate Outcomes. The core issues are not equally important, and their significance will vary according to the specific situation of each country, taking into account the ML/TF risks and relevant structural factors. Therefore, assessors need to be flexible and to use their judgement and experience when reaching conclusions.

61. Assessors’ conclusions should reflect only whether the outcome is being achieved. Assessors should set-aside their own preferences about the best way to achieve effectiveness, and should not be unduly influenced by their own national approach. They should also avoid basing their conclusions on the number of problems or deficiencies identified, as it is possible that a country may
have several weaknesses which are not material in nature or are offset by strengths in other areas, and is therefore able to achieve a high overall level of effectiveness.

62. **Assessors’ conclusions on the level of effectiveness should be primarily descriptive.** Assessors should set out clearly the extent to which they consider the outcome to be achieved overall, noting any variation, such as particular areas where effectiveness is higher or lower. They should also clearly explain the basis for their judgement, e.g., problems or weaknesses which they believe are responsible for a lack of effectiveness; the core issues and the information which they considered to be most significant; the way in which they understood data and other indicators; and the weight they gave to different aspects of the assessment. Assessors should also identify any areas of particular strength or examples of good practice.

63. In order to ensure clear and comparable decisions, assessors should also summarise their conclusion in the form of a rating. For each Immediate Outcome there are four possible ratings for effectiveness, based on the extent to which the core issues and characteristics are addressed: **High level of effectiveness; Substantial level of effectiveness; Moderate level of effectiveness; and Low level of effectiveness.** These ratings should be decided on the basis of the following:

<table>
<thead>
<tr>
<th>Effectiveness ratings</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>High level of effectiveness</td>
<td>The Immediate Outcome is achieved to a very large extent. Minor improvements needed.</td>
</tr>
<tr>
<td>Substantial level of effectiveness</td>
<td>The Immediate Outcome is achieved to a large extent. Moderate improvements needed.</td>
</tr>
<tr>
<td>Moderate level of effectiveness</td>
<td>The Immediate Outcome is achieved to some extent. Major improvements needed.</td>
</tr>
<tr>
<td>Low level of effectiveness</td>
<td>The Immediate Outcome is not achieved or achieved to a negligible extent. Fundamental improvements needed.</td>
</tr>
</tbody>
</table>

**RECOMMENDATIONS ON HOW TO IMPROVE THE AML/CFT SYSTEM**

64. **Assessors’ recommendations to a country are a vitally important part of the evaluation.** On the basis of their conclusions, assessors should make recommendations of measures that the country should take in order to improve its AML/CFT system, including both the level of effectiveness and the level of technical compliance. The report should prioritise these recommendations for remedial measures, taking into account the country’s circumstances and capacity, its level of effectiveness, and any weaknesses and problems identified. Assessors’ recommendations should not simply be to address each of the deficiencies or weaknesses identified, but should add value by identifying and prioritising specific measures in order to most effectively mitigate the risks the country faces. This
could be on the basis that they offer the greatest and most rapid practical improvements, have the widest-reaching effects, or are easiest to achieve.

65. Assessors should be careful to consider the circumstances and context of the country, and its legal and institutional system when making recommendations, noting that there are several different ways to achieve an effective AML/CFT system, and that their own preferred model may not be appropriate in the context of the country assessed.

66. In order to facilitate the development of an action plan by the assessed country, assessors should clearly indicate in their recommendations where a specific action is required, and where there may be some flexibility about how a given priority objective is to be achieved. Assessors should avoid making unnecessarily rigid recommendations (e.g., on the scheduling of certain measures), so as not to hinder countries efforts to fully adapt the recommendations to fit local circumstances.

67. Even if a country has a high level of effectiveness, this does not imply that there is no further room for improvement. There may also be a need for action in order to sustain a high level of effectiveness in the face of evolving risks. If assessors are able to identify further actions in areas where there is a high degree of effectiveness, then they should also include these in their recommendations.

**POINT OF REFERENCE**

68. If assessors have any doubts about how to apply this Methodology, or about the interpretation of the FATF Standards, they should consult the FATF Secretariat or the Secretariat of their FSRB.
TECHNICAL COMPLIANCE ASSESSMENT

RECOMMENDATION 1  ASSESSING RISKS AND APPLYING A RISK-BASED APPROACH

OBLIGATIONS AND DECISIONS FOR COUNTRIES

Risk assessment

1.1 Countries should identify and assess the ML/TF risks for the country,

1.2 Countries should designate an authority or mechanism to co-ordinate actions to assess risks.

1.3 Countries should keep the risk assessments up-to-date.

1.4 Countries should have mechanisms to provide information on the results of the risk assessment(s) to all relevant competent authorities and self-regulatory bodies (SRBs), financial institutions and DNFBPs.

Risk mitigation

1.5 Based on their understanding of their risks, countries should apply a risk-based approach to allocating resources and implementing measures to prevent or mitigate ML/TF.

1.6 Countries which decide not to apply some of the FATF Recommendations requiring financial institutions or DNFBPs to take certain actions, should demonstrate that:

(a) there is a proven low risk of ML/TF; the exemption occurs in strictly limited and justified circumstances; and it relates to a particular type of financial institution or activity, or DNFBP; or

(b) a financial activity (other than the transferring of money or value) is carried out by a natural or legal person on an occasional or very limited basis (having regard to quantitative and absolute criteria), such that there is a low risk of ML/TF.

4 The requirements in this recommendation should be assessed taking into account the more specific risk based requirements in other Recommendations. Under Recommendation 1 assessors should come to an overall view of risk assessment and risk mitigation by countries and financial institutions/DNFBPs as required in other Recommendations, but should not duplicate the detailed assessments of risk-based measures required under other Recommendations. Assessors are not expected to conduct an in-depth review of the country’s assessment(s) of risks. Assessors should focus on the process, mechanism, and information sources adopted by the country, as well as the contextual factors, and should consider the reasonableness of the conclusions of the country’s assessment(s) of risks.

5 Where appropriate, ML/TF risk assessments at a supra-national level should be taken into account when considering whether this obligation is satisfied.
1.7 Where countries identify higher risks, they should ensure that their AML/CFT regime addresses such risks, including through: (a) requiring financial institutions and DNFBPs to take enhanced measures to manage and mitigate the risks; or (b) requiring financial institutions and DNFBPs to ensure that this information is incorporated into their risk assessments.

1.8 Countries may allow simplified measures for some of the FATF Recommendations requiring financial institutions or DNFBPs to take certain actions, provided that a lower risk has been identified, and this is consistent with the country’s assessment of its ML/TF risks.

1.9 Supervisors and SRBs should ensure that financial institutions and DNFBPs are implementing their obligations under Recommendation 17.

OBLIGATIONS AND DECISIONS FOR FINANCIAL INSTITUTIONS AND DNFBPS

Risk assessment

1.10 Financial institutions and DNFBPs should be required to take appropriate steps to identify, assess, and understand their ML/TF risks (for customers, countries or geographic areas; and products, services, transactions or delivery channels). This includes being required to:

(a) document their risk assessments;
(b) consider all the relevant risk factors before determining what is the level of overall risk and the appropriate level and type of mitigation to be applied;
(c) keep these assessments up to date; and
(d) have appropriate mechanisms to provide risk assessment information to competent authorities and SRBs.

Risk mitigation

1.11 Financial institutions and DNFBPs should be required to:

---

6 Where the FATF Recommendations identify higher risk activities for which enhanced or specific measures are required, countries should ensure that all such measures are applied, although the extent of such measures may vary according to the specific level of risk.

7 The requirements in this criterion should be assessed taking into account the findings in relation to Recommendations 26 and 28.

8 The nature and extent of any assessment of ML/TF risks should be appropriate to the nature and size of the business. Competent authorities or SRBs may determine that individual documented risk assessments are not required, provided that the specific risks inherent to the sector are clearly identified and understood, and that individual financial institutions and DNFBPs understand their ML/TF risks.
(a) have policies, controls and procedures, which are approved by senior management, to enable them to manage and mitigate the risks that have been identified (either by the country or by the financial institution or DNFBP);

(b) monitor the implementation of those controls and to enhance them if necessary; and

(c) take enhanced measures to manage and mitigate the risks where higher risks are identified.

1.12 Countries may only permit financial institutions and DNFBPs to take simplified measures to manage and mitigate risks, if lower risks have been identified, and criteria 1.9 to 1.11 are met. Simplified measures should not be permitted whenever there is a suspicion of ML/TF.
RECOMMENDATION 2  NATIONAL CO-OPERATION AND CO-ORDINATION

2.1 Countries should have national AML/CFT policies which are informed by the risks identified, and are regularly reviewed.

2.2 Countries should designate an authority or have a co-ordination or other mechanism that is responsible for national AML/CFT policies.

2.3 Mechanisms should be in place to enable policy makers, the Financial Intelligence Unit (FIU), law enforcement authorities, supervisors and other relevant competent authorities to co-operate, and where appropriate, co-coordinate domestically with each other concerning the development and implementation of AML/CFT policies and activities. Such mechanisms should apply at both policymaking and operational levels.

2.4 Competent authorities should have similar co-operation and, where appropriate, co-ordination mechanisms to combat the financing of proliferation of weapons of mass destruction.
3.1 ML should be criminalised on the basis of the Vienna Convention and the Palermo Convention (see Article 3(1)(b)&(c) Vienna Convention and Article 6(1) Palermo Convention)\(^9\).

3.2 The predicate offences for ML should cover all serious offences, with a view to including the widest range of predicate offences. At a minimum, predicate offences should include a range of offences in each of the designated categories of offences\(^10\).

3.3 Where countries apply a threshold approach or a combined approach that includes a threshold approach\(^11\), predicate offences should, at a minimum, comprise all offences that:
   - (a) fall within the category of serious offences under their national law; or
   - (b) are punishable by a maximum penalty of more than one year’s imprisonment; or
   - (c) are punished by a minimum penalty of more than six months’ imprisonment (for countries that have a minimum threshold for offences in their legal system).

3.4 The ML offence should extend to any type of property, regardless of its value, that directly or indirectly represents the proceeds of crime.

3.5 When proving that property is the proceeds of crime, it should not be necessary that a person be convicted of a predicate offence.

3.6 Predicate offences for money laundering should extend to conduct that occurred in another country, which constitutes an offence in that country, and which would have constituted a predicate offence had it occurred domestically.

3.7 The ML offence should apply to persons who commit the predicate offence, unless this is contrary to fundamental principles of domestic law.

3.8 It should be possible for the intent and knowledge required to prove the ML offence to be inferred from objective factual circumstances.

3.9 Proportionate and dissuasive criminal sanctions should apply to natural persons convicted of ML.

---

\(^9\) Note in particular the physical and material elements of the offence.

\(^10\) Recommendation 3 does not require countries to create a separate offence of “participation in an organised criminal group and racketeering”. In order to cover this category of “designated offence”, it is sufficient if a country meets either of the two options set out in the Palermo Convention, i.e. either a separate offence or an offence based on conspiracy.

\(^11\) Countries determine the underlying predicate offences for ML by reference to (a) all offences; or (b) to a threshold linked either to a category of serious offences or to the penalty of imprisonment applicable to the predicate offence (threshold approach); or (c) to a list of predicate offences; or (d) a combination of these approaches.
3.10 Criminal liability and sanctions, and, where that is not possible (due to fundamental principles of domestic law), civil or administrative liability and sanctions, should apply to legal persons. This should not preclude parallel criminal, civil or administrative proceedings with respect to legal persons in countries in which more than one form of liability is available. Such measures are without prejudice to the criminal liability of natural persons. All sanctions should be proportionate and dissuasive.

3.11 Unless it is not permitted by fundamental principles of domestic law, there should be appropriate ancillary offences to the ML offence, including: participation in; association with or conspiracy to commit; attempt; aiding and abetting; facilitating; and counselling the commission.
RECOMMENDATION 4
CONFISCATION AND PROVISIONAL MEASURES

4.1 Countries should have measures, including legislative measures, that enable the confiscation of the following, whether held by criminal defendants or by third parties:

(a) property laundered;
(b) proceeds of (including income or other benefits derived from such proceeds), or instrumentalities used or intended for use in, ML or predicate offences;
(c) property that is the proceeds of, or used in, or intended or allocated for use in the financing of terrorism, terrorist acts or terrorist organisations; or
(d) property of corresponding value.

4.2 Countries should have measures, including legislative measures, that enable their competent authorities to:

(a) identify, trace and evaluate property that is subject to confiscation;
(b) carry out provisional measures, such as freezing or seizing, to prevent any dealing, transfer or disposal of property subject to confiscation\(^\text{12}\);
(c) take steps that will prevent or void actions that prejudice the country’s ability to freeze or seize or recover property that is subject to confiscation; and
(d) take any appropriate investigative measures.

4.3 Laws and other measures should provide protection for the rights of \textit{bona fide} third parties.

4.4 Countries should have mechanisms for managing and, when necessary, disposing of property frozen, seized or confiscated.

\(^{12}\) Measures should allow the initial application to freeze or seize property subject to confiscation to be made \textit{ex-parte} or without prior notice, unless this is inconsistent with fundamental principles of domestic law.
RECOMMENDATION 5  TERRORIST FINANCING OFFENCE

5.1 Countries should criminalise TF on the basis of the Terrorist Financing Convention\(^\text{13}\).

5.2 TF offences should extend to any person who willfully provides or collects funds by any means, directly or indirectly, with the unlawful intention that they should be used, or in the knowledge that they are to be used, in full or in part: (a) to carry out a terrorist act(s); or (b) by a terrorist organisation or by an individual terrorist (even in the absence of a link to a specific terrorist act or acts).\(^\text{14}\)

5.3 TF offences should extend to any funds whether from a legitimate or illegitimate source.

5.4 TF offences should not require that the funds: (a) were actually used to carry out or attempt a terrorist act(s); or (b) be linked to a specific terrorist act(s).

5.5 It should be possible for the intent and knowledge required to prove the offence to be inferred from objective factual circumstances.

5.6 Proportionate and dissuasive criminal sanctions should apply to natural persons convicted of TF.

5.7 Criminal liability and sanctions, and, where that is not possible (due to fundamental principles of domestic law), civil or administrative liability and sanctions, should apply to legal persons. This should not preclude parallel criminal, civil or administrative proceedings with respect to legal persons in countries in which more than one form of liability is available. Such measures should be without prejudice to the criminal liability of natural persons. All sanctions should be proportionate and dissuasive.

5.8 It should also be an offence to:
   (a) attempt to commit the TF offence;
   (b) participate as an accomplice in a TF offence or attempted offence;
   (c) organise or direct others to commit a TF offence or attempted offence; and
   (d) contribute to the commission of one or more TF offence(s) or attempted offence(s), by a group of persons acting with a common purpose\(^\text{15}\).

5.9 TF offences should be designated as ML predicate offences.

---

\(^{13}\) Criminalisation should be consistent with Article 2 of the International Convention for the Suppression of the Financing of Terrorism.

\(^{14}\) Criminalising TF solely on the basis of aiding and abetting, attempt, or conspiracy is not sufficient to comply with the Recommendation.

\(^{15}\) Such contribution shall be intentional and shall either: (i) be made with the aim of furthering the criminal activity or criminal purpose of the group, where such activity or purpose involves the commission of a TF offence; or (ii) be made in the knowledge of the intention of the group to commit a TF offence.
5.10 TF offences should apply, regardless of whether the person alleged to have committed the offence(s) is in the same country or a different country from the one in which the terrorist(s)/terrorist organisation(s) is located or the terrorist act(s) occurred/will occur.
Identifying and designating

6.1 In relation to designations pursuant to United Nations Security Council 1267/1989 (Al Qaida) and 1988 sanctions regimes (Referred to below as “UN Sanctions Regimes”), countries should:

(a) identify a competent authority or a court as having responsibility for proposing persons or entities to the 1267/1989 Committee for designation; and for proposing persons or entities to the 1988 Committee for designation;

(b) have a mechanism(s) for identifying targets for designation, based on the designation criteria set out in the relevant United Nations Security Council resolutions (UNSCRs);

(c) apply an evidentiary standard of proof of “reasonable grounds” or “reasonable basis” when deciding whether or not to make a proposal for designation. Such proposals for designations should not be conditional upon the existence of a criminal proceeding;

(d) follow the procedures and (in the case of UN Sanctions Regimes) standard forms for listing, as adopted by the relevant committee (the 1267/1989 Committee or 1988 Committee); and

(e) provide as much relevant information as possible on the proposed name; a statement of case which contains as much detail as possible on the basis for the listing; and (in the case of proposing names to the 1267/1989 Committee), specify whether their status as a designating state may be made known.

6.2 In relation to designations pursuant to UNSCR 1373, countries should:

(a) identify a competent authority or a court as having responsibility for designating persons or entities that meet the specific criteria for designation, as set forth in UNSCR 1373; as put forward either on the country's own motion or, after examining and giving effect to, if appropriate, the request of another country.

---

16 In particular, sufficient identifying information to allow for the accurate and positive identification of individuals, groups, undertakings, and entities, and to the extent possible, the information required by Interpol to issue a Special Notice

17 This statement of case should be releasable, upon request, except for the parts a Member State identifies as being confidential to the relevant committee (the 1267/1989 Committee or 1988 Committee).

18 Including: specific information supporting a determination that the person or entity meets the relevant designation; the nature of the information; supporting information or documents that can be provided; and details of any connection between the proposed designee and any currently designated person or entity
(b) have a mechanism(s) for identifying targets for designation, based on the designation criteria set out in UNSCR 1373;  
(c) when receiving a request, make a prompt determination of whether they are satisfied, according to applicable (supra-) national principles that the request is supported by reasonable grounds, or a reasonable basis, to suspect or believe that the proposed designee meets the criteria for designation in UNSCR 1373;  
(d) apply an evidentiary standard of proof of “reasonable grounds” or “reasonable basis” when deciding whether or not to make a designation. Such (proposals for) designations should not be conditional upon the existence of a criminal proceeding; and  
(e) when requesting another country to give effect to the actions initiated under the freezing mechanisms, provide as much identifying information, and specific information supporting the designation, as possible.

6.3 The competent authority(ies) should have legal authorities and procedures or mechanisms to:  
(a) collect or solicit information to identify persons and entities that, based on reasonable grounds, or a reasonable basis to suspect or believe, meet the criteria for designation; and  
(b) operate *ex parte* against a person or entity who has been identified and whose (proposal for) designation is being considered.  

**Freezing**

6.4 Countries should implement targeted financial sanctions without delay.  
6.5 Countries should have the legal authority and identify domestic competent authorities responsible for implementing and enforcing targeted financial sanctions, in accordance with the following standards and procedures:

---

19 This includes having authority and effective procedures or mechanisms to examine and give effect to, if appropriate, the actions initiated under the freezing mechanisms of other countries pursuant to UNSCR 1373 (2001)

20 A country should apply the legal standard of its own legal system regarding the kind and quantum of evidence for the determination that “reasonable grounds” or “reasonable basis” exist for a decision to designate a person or entity, and thus initiate an action under a freezing mechanism. This is the case irrespective of whether the proposed designation is being put forward on the relevant country’s own motion or at the request of another country.

21 For UNSCR 1373, the obligation to take action without delay is triggered by a designation at the (supra-) national level, as put forward either on the country’s own motion or at the request of another country, if the country receiving the request is satisfied, according to applicable legal principles, that a requested designation is supported by reasonable grounds, or a reasonable basis, to suspect or believe that the proposed designee meets the criteria for designation in UNSCR 1373.
(a) Countries should require all natural and legal persons within the country to freeze, without delay and without prior notice, the funds or other assets of designated persons and entities.

(b) The obligation to freeze should extend to: (i) all funds or other assets that are owned or controlled by the designated person or entity, and not just those that can be tied to a particular terrorist act, plot or threat; (ii) those funds or other assets that are wholly or jointly owned or controlled, directly or indirectly, by designated persons or entities; and (iii) the funds or other assets derived or generated from funds or other assets owned or controlled directly or indirectly by designated persons or entities, as well as (iv) funds or other assets of persons and entities acting on behalf of, or at the direction of, designated persons or entities.

(c) Countries should prohibit their nationals, or any persons and entities within their jurisdiction, from making any funds or other assets, economic resources, or financial or other related services, available, directly or indirectly, wholly or jointly, for the benefit of designated persons and entities; entities owned or controlled, directly or indirectly, by designated persons or entities; and persons and entities acting on behalf of, or at the direction of, designated persons or entities, unless licensed, authorised or otherwise notified in accordance with the relevant UNSCRs.

(d) Countries should have mechanisms for communicating designations to the financial sector and the DNFBPs immediately upon taking such action, and providing clear guidance to financial institutions and other persons or entities, including DNFBPs, that may be holding targeted funds or other assets, on their obligations in taking action under freezing mechanisms.

(e) Countries should require financial institutions and DNFBPs to report to competent authorities any assets frozen or actions taken in compliance with the prohibition requirements of the relevant UNSCRs, including attempted transactions.

(f) Countries should adopt measures which protect the rights of bona fide third parties acting in good faith when implementing the obligations under Recommendation 6.

De-listing, unfreezing and providing access to frozen funds or other assets

6.6 Countries should have publicly known procedures to de-list and unfreeze the funds or other assets of persons and entities which do not, or no longer, meet the criteria for designation. These should include:

(a) procedures to submit de-listing requests to the relevant UN sanctions Committee in the case of persons and entities designated pursuant to the UN Sanctions Regimes, in the view of the country, do not or no longer meet the criteria for designation.

22 “or”, in this particular case means that countries must both prohibit their own nationals and prohibit any persons/entities in their jurisdiction.
Such procedures and criteria should be in accordance with procedures adopted by the 1267/1989 Committee or the 1988 Committee, as appropriate:\(^23\); (b) legal authorities and procedures or mechanisms to de-list and unfreeze the funds or other assets of persons and entities designated pursuant to UNSCR 1373, that no longer meet the criteria for designation; (c) with regard to designations pursuant to UNSCR 1373, procedures to allow, upon request, review of the designation decision before a court or other independent competent authority; (d) with regard to designations pursuant to UNSCR 1988, procedures to facilitate review by the 1988 Committee in accordance with any applicable guidelines or procedures adopted by the 1988 Committee, including those of the Focal Point mechanism established under UNSCR 1730; (e) with respect to designations on the Al-Qaida Sanctions List, procedures for informing designated persons and entities of the availability of the United Nations Office of the Ombudsperson, pursuant to UNSCRs 1904, 1989, and 2083 to accept de-listing petitions; (f) publicly known procedures to unfreeze the funds or other assets of persons or entities with the same or similar name as designated persons or entities, who are inadvertently affected by a freezing mechanism (i.e. a false positive), upon verification that the person or entity involved is not a designated person or entity; and (g) mechanisms for communicating de-listings and unfreezings to the financial sector and the DNFBPs immediately upon taking such action, and providing guidance to financial institutions and other persons or entities, including DNFBPs, that may by holding targeted funds or other assets, on their obligations to respect a de-listing or unfreezing action.

6.7 Countries should authorise access to frozen funds or other assets which have been determined to be necessary for basic expenses, for the payment of certain types of fees, expenses and service charges, or for extraordinary expenses, in accordance with the procedures set out in UNSCR 1452 and any successor resolutions. On the same grounds, countries should authorise access to funds or other assets, if freezing measures are applied to persons and entities designated by a (supra-)national country pursuant to UNSCR 1373.

---

\(^23\) The procedures of the 1267/1989 Committee are set out in UNSCRs 1730; 1735; 1822; 1904; 1989; 2083 and any successor resolutions. The procedures of the 1988 Committee are set out in UNSCRs 1730; 1735; 1822; 1904; 1988; 2082; and any successor resolutions.
RECOMMENDATION 7  TARGETED FINANCIAL SANCTIONS RELATED TO PROLIFERATION

7.1 Countries should implement targeted financial sanctions without delay to comply with United Nations Security Council Resolutions, adopted under Chapter VII of the Charter of the United Nations, relating to the prevention, suppression and disruption of proliferation of weapons of mass destruction and its financing.\(^\text{24}\).

7.2 Countries should establish the necessary legal authority and identify competent authorities responsible for implementing and enforcing targeted financial sanctions, and should do so in accordance with the following standards and procedures.

(a) Countries should require all natural and legal persons within the country to freeze, without delay and without prior notice, the funds or other assets of designated persons and entities.

(b) The freezing obligation should extend to: (i) all funds or other assets that are owned or controlled by the designated person or entity, and not just those that can be tied to a particular act, plot or threat of proliferation; (ii) those funds or other assets that are wholly or jointly owned or controlled, directly or indirectly, by designated persons or entities; and (iii) the funds or other assets derived or generated from funds or other assets owned or controlled directly or indirectly by designated persons or entities, as well as (iv) funds or other assets of persons and entities acting on behalf of, or at the direction of designated persons or entities.

(c) Countries should ensure that any funds or other assets are prevented from being made available by their nationals or by any persons or entities within their territories, to or for the benefit of designated persons or entities unless licensed, authorised or otherwise notified in accordance with the relevant United Nations Security Council Resolutions.

(d) Countries should have mechanisms for communicating designations to financial institutions and DNFBPs immediately upon taking such action, and providing clear guidance to financial institutions and other persons or entities, including DNFBPs, that may be holding targeted funds or other assets, on their obligations in taking action under freezing mechanisms.

\(^{24}\) Recommendation 7 is applicable to all current UNSCRs applying targeted financial sanctions relating to the financing of proliferation of weapons of mass destruction, any future successor resolutions, and any future UNSCRs which impose targeted financial sanctions in the context of the financing of proliferation of weapons of mass destruction. At the time of issuance of this Methodology, (February 2013), the UNSCRs applying targeted financial sanctions relating to the financing of proliferation of weapons of mass destruction are: S/RES/1718(2006), S/RES/1737(2006), S/RES/1747(2007), S/RES/1803(2008), S/RES/1874(2009), and S/RES/1929(2010).
Countries should require financial institutions and DNFBPs to report to competent authorities any assets frozen or actions taken in compliance with the prohibition requirements of the relevant UNSCRs, including attempted transactions.

Countries should adopt measures which protect the rights of *bona fide* third parties acting in good faith when implementing the obligations under Recommendation 7.

7.3 Countries should adopt measures for monitoring and ensuring compliance by financial institutions and DNFBPs with the relevant laws or enforceable means governing the obligations under Recommendation 7. Failure to comply with such laws or enforceable means should be subject to civil, administrative or criminal sanctions.

7.4 Countries should develop and implement publicly known procedures to submit de-listing requests to the Security Council in the case of designated persons and entities that, in the view of the country, do not or no longer meet the criteria for designation. These should include:

(a) enabling listed persons and entities to petition a request for de-listing at the Focal Point for de-listing established pursuant to UNSCR 1730, or informing designated persons or entities to petition the Focal Point directly;

(b) publicly known procedures to unfreeze the funds or other assets of persons or entities with the same or similar name as designated persons or entities, who are inadvertently affected by a freezing mechanism (*i.e.*, a false positive), upon verification that the person or entity involved is not a designated person or entity;

(c) authorising access to funds or other assets, where countries have determined that the exemption conditions set out in UNSCRs 1718 and 1737 are met, in accordance with the procedures set out in those resolutions; and

(d) mechanisms for communicating de-listings and unfreezings to the financial sector and the DNFBPs immediately upon taking such action, and providing guidance to financial institutions and other persons or entities, including DNFBPs, that may be holding targeted funds or other assets, on their obligations to respect a de-listing or unfreezing action.

7.5 With regard to contracts, agreements or obligations that arose prior to the date on which accounts became subject to targeted financial sanctions:

(a) countries should permit the addition to the accounts frozen pursuant to UNSCRs 1718 or 1737 of interests or other earnings due on those accounts or payments due under contracts, agreements or obligations that arose prior to the date on which those accounts became subject to the provisions of this resolution, provided that any such interest, other earnings and payments continue to be subject to these provisions and are frozen; and

---

25 Such procedures and criteria should be in accordance with any applicable guidelines or procedures adopted by the United Nations Security Council pursuant to UNSCR 1730 (2006) and any successor resolutions, including those of the Focal Point mechanism established under that resolution.
(b) freezing action taken pursuant to UNSCR 1737 should not prevent a designated person or entity from making any payment due under a contract entered into prior to the listing of such person or entity, provided that: (i) the relevant countries have determined that the contract is not related to any of the prohibited items, materials, equipment, goods, technologies, assistance, training, financial assistance, investment, brokering or services referred to in the relevant Security Council resolution; (ii) the relevant countries have determined that the payment is not directly or indirectly received by a person or entity designated pursuant to UNSCR 1737; and (iii) the relevant countries have submitted prior notification to the 1737 Sanctions Committee of the intention to make or receive such payments or to authorise, where appropriate, the unfreezing of funds, other financial assets or economic resources for this purpose, ten working days prior to such authorisation.
### RECOMMENDATION 8: NON-PROFIT ORGANISATIONS (NPOS)

8.1 Countries should:

(a) review the adequacy of laws and regulations that relate to entities that can be abused for the financing of terrorism, including NPOS;

(b) undertake domestic reviews of their NPO sector, or have the capacity to obtain timely information on its activities, size and other relevant features, using all available sources of information, in order to identify the features and types of NPOs that are particularly at risk of being misused for TF or other forms of terrorist support by virtue of their activities or characteristics; and

(c) periodically reassess their NPO sector by reviewing new information on the sector's potential vulnerabilities to terrorist activities.

8.2 Countries should conduct outreach to the NPO sector concerning TF issues.

8.3 Countries should have clear policies to promote transparency, integrity, and public confidence in the administration and management of all NPOs.

8.4 Countries should apply the following standards to NPOs which account for (i) a significant portion of the financial resources under the control of the sector; and (ii) a substantial share of the sector’s international activities. Such NPOs should be required to:

(a) maintain information on: (i) the purpose and objectives of their stated activities; and (ii) the identity of person(s) who own, control or direct their activities, including senior officers, board members and trustees. This information should be publicly available either directly from the NPO or through appropriate authorities;

(b) issue annual financial statements that provide detailed breakdowns of income and expenditure;

(c) have controls in place to ensure that all funds are fully accounted for, and are spent in a manner that is consistent with the purpose and objectives of the NPO’s stated activities;

(d) be licensed or registered\(^{26}\);

(e) follow a “know your beneficiaries and associated NPOs” rule; and

(f) maintain, for a period of at least five years, records of domestic and international transactions\(^{27}\), and the information in (a) and (b) above, and make these available to competent authorities upon appropriate authority.

---

\(^{26}\) Specific licensing or registration requirements for AML/CFT purposes are not necessary. For example, in some countries, NPOS are already registered with tax authorities and monitored in the context of qualifying for favourable tax treatment (such as tax credits or tax exemptions).
8.5 Competent authorities should monitor the compliance of NPOs with Criterion 8.4, and should be able to apply proportionate and dissuasive sanctions for violations of the requirements by NPOs or persons acting on behalf of these NPOs.\textsuperscript{28}

8.6 Authorities should be able to investigate and gather information on NPOs, including through:

- (a) domestic co-operation, co-ordination and information-sharing among authorities or organisations that hold relevant information on NPOs;
- (b) full access to information on the administration and management of particular NPOs (including financial and programmatic information); and
- (c) mechanisms to ensure that relevant information is promptly shared with competent authorities, in order to take preventive or investigative action, when there is suspicion or reasonable grounds to suspect that a particular NPO is: a front for fundraising by a terrorist organisation; or being exploited as a conduit for TF, including for the purpose of escaping asset freezing measures; or concealing or obscuring the clandestine diversion of funds intended for legitimate purposes, but redirected for the benefit of terrorists or terrorist organisations.

8.7 Countries should identify appropriate points of contact and procedures to respond to international requests for information regarding particular NPOs suspected of TF or other forms of terrorist support.

\textsuperscript{27} Such records should be sufficiently detailed to verify that funds have been spent in a manner consistent with the purpose and objectives of the organisation.

\textsuperscript{28} The range of such sanctions might include freezing of accounts, removal of trustees, fines, de-certification, de-licensing and de-registration. This should not preclude parallel civil, administrative, or criminal proceedings with respect to NPOs or persons acting on their behalf where appropriate.
9.1 Financial institution secrecy laws should not inhibit the implementation of the FATF Recommendations\textsuperscript{29}.
RECOMMENDATION 10  CUSTOMER DUE DILIGENCE\textsuperscript{30} (CDD)

10.1 Financial institutions should be prohibited from keeping anonymous accounts or accounts in obviously fictitious names.

\textit{When CDD is required}

10.2 Financial institutions should be required to undertake CDD measures when:

\begin{itemize}
\item[(a)] establishing business relations;
\item[(b)] carrying out occasional transactions above the applicable designated threshold (USD/EUR 15 000), including situations where the transaction is carried out in a single operation or in several operations that appear to be linked;
\item[(c)] carrying out occasional transactions that are wire transfers in the circumstances covered by Recommendation 16 and its Interpretive Note;
\item[(d)] there is a suspicion of ML/TF, regardless of any exemptions or thresholds that are referred to elsewhere under the FATF Recommendations; or
\item[(e)] the financial institution has doubts about the veracity or adequacy of previously obtained customer identification data.
\end{itemize}

\textit{Required CDD measures for all customers}

10.3 Financial institutions should be required to identify the customer (whether permanent or occasional, and whether natural or legal person or legal arrangement) and verify that customer's identity using reliable, independent source documents, data or information (identification data).

10.4 Financial institutions should be required to verify that any person purporting to act on behalf of the customer is so authorised, and identify and verify the identity of that person.

10.5 Financial institutions should be required to identify the beneficial owner and take reasonable measures to verify the identity of the beneficial owner, using the relevant information or data obtained from a reliable source, such that the financial institution is satisfied that it knows who the beneficial owner is.

10.6 Financial institutions should be required to understand and, as appropriate, obtain information on, the purpose and intended nature of the business relationship.

10.7 Financial institutions should be required to conduct ongoing due diligence on the business relationship, including:

\textsuperscript{30} The principle that financial institutions conduct CDD should be set out in law, though specific requirements may be set out in enforceable means.
(a) scrutinising transactions undertaken throughout the course of that relationship to ensure that the transactions being conducted are consistent with the financial institution’s knowledge of the customer, their business and risk profile, including where necessary, the source of funds; and

(b) ensuring that documents, data or information collected under the CDD process is kept up-to-date and relevant, by undertaking reviews of existing records, particularly for higher risk categories of customers.

Specific CDD measures required for legal persons and legal arrangements

10.8 For customers that are legal persons or legal arrangements, the financial institution should be required to understand the nature of the customer’s business and its ownership and control structure.

10.9 For customers that are legal persons or legal arrangements, the financial institution should be required to identify the customer and verify its identity through the following information:

(a) name, legal form and proof of existence;

(b) the powers that regulate and bind the legal person or arrangement, as well as the names of the relevant persons having a senior management position in the legal person or arrangement; and

(c) the address of the registered office and, if different, a principal place of business.

10.10 For customers that are legal persons\(^{31}\), the financial institution should be required to identify and take reasonable measures to verify the identity of beneficial owners through the following information:

(a) the identity of the natural person(s) \(^{32}\) who ultimately has a controlling ownership interest\(^{33}\) in a legal person; and

(b) to the extent that there is doubt under (a) as to whether the person(s) with the controlling ownership interest is the beneficial owner(s) or where no natural person exerts control through ownership interests, the identity of the natural

---

\(^{31}\) Where the customer or the owner of the controlling interest is a company listed on a stock exchange and subject to disclosure requirements (either by stock exchange rules or through law or enforceable means) which impose requirements to ensure adequate transparency of beneficial ownership, or is a majority-owned subsidiary of such a company, it is not necessary to identify and verify the identity of any shareholder or beneficial owner of such companies. The relevant identification data may be obtained from a public register, from the customer or from other reliable sources.

\(^{32}\) Ownership interests can be so diversified that there are no natural persons (whether acting alone or together) exercising control of the legal person or arrangement through ownership.

\(^{33}\) A controlling ownership interest depends on the ownership structure of the company. It may be based on a threshold, e.g. any person owning more than a certain percentage of the company (e.g. 25%).
person(s) (if any) exercising control of the legal person or arrangement through other means; and

(c) where no natural person is identified under (a) or (b) above, the identity of the relevant natural person who holds the position of senior managing official.

10.11 For customers that are legal arrangements, the financial institution should be required to identify and take reasonable measures to verify the identity of beneficial owners through the following information:

(a) for trusts, the identity of the settlor, the trustee(s), the protector (if any), the beneficiaries or class of beneficiaries\(^{34}\), and any other natural person exercising ultimate effective control over the trust (including through a chain of control/ownership);

(b) for other types of legal arrangements, the identity of persons in equivalent or similar positions.

**CDD for Beneficiaries of Life Insurance Policies**

10.12 In addition to the CDD measures required for the customer and the beneficial owner, financial institutions should be required to conduct the following CDD measures on the beneficiary of life insurance and other investment related insurance policies, as soon as the beneficiary is identified or designated:

(a) for a beneficiary that is identified as specifically named natural or legal persons or legal arrangements – taking the name of the person;

(b) for a beneficiary that is designated by characteristics or by class or by other means – obtaining sufficient information concerning the beneficiary to satisfy the financial institution that it will be able to establish the identity of the beneficiary at the time of the payout;

(c) for both the above cases – the verification of the identity of the beneficiary should occur at the time of the payout.

10.13 Financial institutions should be required to include the beneficiary of a life insurance policy as a relevant risk factor in determining whether enhanced CDD measures are applicable. If the financial institution determines that a beneficiary who is a legal person or a legal arrangement presents a higher risk, it should be required to take enhanced measures which should include reasonable measures to identify and verify the identity of the beneficial owner of the beneficiary, at the time of payout.

---

\(^{34}\) For beneficiaries of trusts that are designated by characteristics or by class, financial institutions should obtain sufficient information concerning the beneficiary to satisfy the financial institution that it will be able to establish the identity of the beneficiary at the time of the payout or when the beneficiary intends to exercise vested rights.
Timing of verification

10.14 Financial institutions should be required to verify the identity of the customer and beneficial owner before or during the course of establishing a business relationship or conducting transactions for occasional customers; or (if permitted) may complete verification after the establishment of the business relationship, provided that:

(a) this occurs as soon as reasonably practicable;
(b) this is essential not to interrupt the normal conduct of business; and
(c) the ML/TF risks are effectively managed.

10.15 Financial institutions should be required to adopt risk management procedures concerning the conditions under which a customer may utilise the business relationship prior to verification.

Existing customers

10.16 Financial institutions should be required to apply CDD requirements to existing customers\(^{35}\) on the basis of materiality and risk, and to conduct due diligence on such existing relationships at appropriate times, taking into account whether and when CDD measures have previously been undertaken and the adequacy of data obtained.

Risk-Based Approach

10.17 Financial institutions should be required to perform enhanced due diligence where the ML/TF risks are higher.

10.18 Financial institutions may only be permitted to apply simplified CDD measures where lower risks have been identified, through an adequate analysis of risks by the country or the financial institution. The simplified measures should be commensurate with the lower risk factors, but are not acceptable whenever there is suspicion of ML/TF, or specific higher risk scenarios apply.

Failure to satisfactorily complete CDD

10.19 Where a financial institution is unable to comply with relevant CDD measures:

(a) it should be required not to open the account, commence business relations or perform the transaction; or should be required to terminate the business relationship; and

(b) it should be required to consider making a suspicious transaction report (STR) in relation to the customer.

\(^{35}\) Existing customers as at the date that the new national requirements are brought into force.
**CDD and tipping-off**

10.20 In cases where financial institutions form a suspicion of money laundering or terrorist financing, and they reasonably believe that performing the CDD process will tip-off the customer, they should be permitted not to pursue the CDD process, and instead should be required to file an STR.
RECOMMENDATION 11 RECORD KEEPING

11.1 Financial institutions should be required to maintain all necessary records on transactions, both domestic and international, for at least five years following completion of the transaction.

11.2 Financial institutions should be required to keep all records obtained through CDD measures, account files and business correspondence, and results of any analysis undertaken, for at least five years following the termination of the business relationship or after the date of the occasional transaction.

11.3 Transaction records should be sufficient to permit reconstruction of individual transactions so as to provide, if necessary, evidence for prosecution of criminal activity.

11.4 Financial institutions should be required to ensure that all CDD information and transaction records are available swiftly to domestic competent authorities upon appropriate authority.

36 The principle that financial institutions should maintain records on transactions and information obtained through CDD measures should be set out in law.
12.1 In relation to foreign PEPs, in addition to performing the CDD measures required under Recommendation 10, financial institutions should be required to:

(a) put in place risk management systems to determine whether a customer or the beneficial owner is a PEP;

(b) obtain senior management approval before establishing (or continuing, for existing customers) such business relationships;

(c) take reasonable measures to establish the source of wealth and the source of funds of customers and beneficial owners identified as PEPs; and

(d) conduct enhanced ongoing monitoring on that relationship.

12.2 In relation to domestic PEPs or persons who have been entrusted with a prominent function by an international organisation, in addition to performing the CDD measures required under Recommendation 10, financial institutions should be required to:

(a) take reasonable measures to determine whether a customer or the beneficial owner is such a person; and

(b) in cases when there is higher risk business relationship with such a person, adopt the measures in criterion 12.1 (b) to (d).

12.3 Financial institutions should be required to apply the relevant requirements of criteria 12.1 and 12.2 to family members or close associates of all types of PEP.

12.4 In relation to life insurance policies, financial institutions should be required to take reasonable measures to determine whether the beneficiaries and/or, where required, the beneficial owner of the beneficiary, are PEPs. This should occur, at the latest, at the time of the payout. Where higher risks are identified, financial institutions should be required to inform senior management before the payout of the policy proceeds, to conduct enhanced scrutiny on the whole business relationship with the policyholder, and to consider making a suspicious transaction report.
RECOMMENDATION 13

CORRESPONDENT BANKING

13.1 In relation to cross-border correspondent banking and other similar relationships, financial institutions should be required to:

(a) gather sufficient information about a respondent institution to understand fully the nature of the respondent’s business, and to determine from publicly available information the reputation of the institution and the quality of supervision, including whether it has been subject to a ML/TF investigation or regulatory action;

(b) assess the respondent institution’s AML/CFT controls;

(c) obtain approval from senior management before establishing new correspondent relationships; and

(d) clearly understand the respective AML/CFT responsibilities of each institution.

13.2 With respect to “payable-through accounts”, financial institutions should be required to satisfy themselves that the respondent bank:

(a) has performed CDD obligations on its customers that have direct access to the accounts of the correspondent bank; and

(b) is able to provide relevant CDD information upon request to the correspondent bank.

13.3 Financial institutions should be prohibited from entering into, or continuing, correspondent banking relationships with shell banks. They should be required to satisfy themselves that respondent financial institutions do not permit their accounts to be used by shell banks.
14.1 Natural or legal persons that provide MVTS (MVTS providers) should be required to be licensed or registered\textsuperscript{37}.

14.2 Countries should take action, with a view to identifying natural or legal persons that carry out MVTS without a licence or registration, and applying proportionate and dissuasive sanctions to them.

14.3 MVTS providers should be subject to monitoring for AML/CFT compliance.

14.4 Agents for MVTS providers should be required to be licensed or registered by a competent authority, or the MVTS provider should be required to maintain a current list of its agents accessible by competent authorities in the countries in which the MVTS provider and its agents operate.

14.5 MVTS providers that use agents should be required to include them in their AML/CFT programmes and monitor them for compliance with these programmes.

\textsuperscript{37} Countries need not impose a separate licensing or registration system with respect to licensed or registered financial institutions which are authorised to perform MVTS.
15.1 Countries and financial institutions should identify and assess the ML/TF risks that may arise in relation to the development of new products and new business practices, including new delivery mechanisms, and the use of new or developing technologies for both new and pre-existing products.

15.2 Financial institutions should be required to:

(a) undertake the risk assessments prior to the launch or use of such products, practices and technologies; and

(b) take appropriate measures to manage and mitigate the risks.
Ordering financial institutions

16.1 Financial institutions should be required to ensure that all cross-border wire transfers of USD/EUR 1,000 or more are always accompanied by the following:

(a) Required and accurate\textsuperscript{38} originator information:

(i) the name of the originator;

(ii) the originator account number where such an account is used to process the transaction or, in the absence of an account, a unique transaction reference number which permits traceability of the transaction; and

(iii) the originator’s address, or national identity number, or customer identification number, or date and place of birth.

(b) Required beneficiary information:

(i) the name of the beneficiary; and

(ii) the beneficiary account number where such an account is used to process the transaction or, in the absence of an account, a unique transaction reference number which permits traceability of the transaction.

16.2 Where several individual cross-border wire transfers from a single originator are bundled in a batch file for transmission to beneficiaries, the batch file should contain required and accurate originator information, and full beneficiary information, that is fully traceable within the beneficiary country; and the financial institution should be required to include the originator’s account number or unique transaction reference number.

16.3 If countries apply a de minimis threshold for the requirements of criterion 16.1, financial institutions should be required to ensure that all cross-border wire transfers below any applicable de minimis threshold (no higher than USD/EUR 1,000) are always accompanied by the following:

(a) Required originator information:

(i) the name of the originator; and

(ii) the originator account number where such an account is used to process the transaction or, in the absence of an account, a unique transaction reference number which permits traceability of the transaction.

\textsuperscript{38} “Accurate” is used to describe information that has been verified for accuracy; \textit{i.e.} financial institutions should be required to verify the accuracy of the required originator information.
(b) Required beneficiary information:

(i) the name of the beneficiary; and

(ii) the beneficiary account number where such an account is used to process the transaction or, in the absence of an account, a unique transaction reference number which permits traceability of the transaction.

16.4 The information mentioned in criterion 16.3 need not be verified for accuracy. However, the financial institution should be required to verify the information pertaining to its customer where there is a suspicion of ML/TF.

16.5 For domestic wire transfers, the ordering financial institution should be required to ensure that the information accompanying the wire transfer includes originator information as indicated for cross-border wire transfers, unless this information can be made available to the beneficiary financial institution and appropriate authorities by other means.

16.6 Where the information accompanying the domestic wire transfer can be made available to the beneficiary financial institution and appropriate authorities by other means, the ordering financial institution need only be required to include the account number or a unique transaction reference number, provided that this number or identifier will permit the transaction to be traced back to the originator or the beneficiary. The ordering financial institution should be required to make the information available within three business days of receiving the request either from the beneficiary financial institution or from appropriate competent authorities. Law enforcement authorities should be able to compel immediate production of such information.

16.7 The ordering financial institution should be required to maintain all originator and beneficiary information collected, in accordance with Recommendation 11.

16.8 The ordering financial institution should not be allowed to execute the wire transfer if it does not comply with the requirements specified above at criteria 16.1-16.7.

Intermediary financial institutions

16.9 For cross-border wire transfers, an intermediary financial institution should be required to ensure that all originator and beneficiary information that accompanies a wire transfer is retained with it.

16.10 Where technical limitations prevent the required originator or beneficiary information accompanying a cross-border wire transfer from remaining with a related domestic wire transfer, the intermediary financial institution should be required to keep a record, for at least five years, of all the information received from the ordering financial institution or another intermediary financial institution.

---

39 This term also refers to any chain of wire transfers that takes place entirely within the borders of the European Union. It is further noted that the European internal market and corresponding legal framework is extended to the members of the European Economic Area.
16.11 Intermediary financial institutions should be required to take reasonable measures, which are consistent with straight-through processing, to identify cross-border wire transfers that lack required originator information or required beneficiary information.

16.12 Intermediary financial institutions should be required to have risk-based policies and procedures for determining: (a) when to execute, reject, or suspend a wire transfer lacking required originator or required beneficiary information; and (b) the appropriate follow-up action.

**Beneficiary financial institutions**

16.13 Beneficiary financial institutions should be required to take reasonable measures, which may include post-event monitoring or real-time monitoring where feasible, to identify cross-border wire transfers that lack required originator information or required beneficiary information.

16.14 For cross-border wire transfers of USD/EUR 1,000 or more\(^{40}\), a beneficiary financial institution should be required to verify the identity of the beneficiary, if the identity has not been previously verified, and maintain this information in accordance with Recommendation 11.

16.15 Beneficiary financial institutions should be required to have risk-based policies and procedures for determining: (a) when to execute, reject, or suspend a wire transfer lacking required originator or required beneficiary information; and (b) the appropriate follow-up action.

**Money or value transfer service operators**

16.16 MVTS providers should be required to comply with all of the relevant requirements of Recommendation 16 in the countries in which they operate, directly or through their agents.

16.17 In the case of a MVTS provider that controls both the ordering and the beneficiary side of a wire transfer, the MVTS provider should be required to:

(a) take into account all the information from both the ordering and beneficiary sides in order to determine whether an STR has to be filed; and

(b) file an STR in any country affected by the suspicious wire transfer, and make relevant transaction information available to the Financial Intelligence Unit.

**Implementation of Targeted Financial Sanctions**

16.18 Countries should ensure that, in the context of processing wire transfers, financial institutions take freezing action and comply with prohibitions from conducting

---

\(^{40}\) Countries may adopt a *de minimis* threshold for cross-border wire transfers (no higher than USD/EUR 1,000). Countries may, nevertheless, require that incoming cross-border wire transfers below the threshold contain required and accurate originator information.
transactions with designated persons and entities, as per obligations set out in the relevant UNSCRs relating to the prevention and suppression of terrorism and terrorist financing, such as UNSCRs 1267 and 1373, and their successor resolutions.
**RECOMMENDATION 17**

**RELIANCE ON THIRD PARTIES**

17.1 If financial institutions are permitted to rely on third-party financial institutions and DNFBPs to perform elements (a)-(c) of the CDD measures set out in Recommendation 10 (identification of the customer; identification of the beneficial owner; and understanding the nature of the business) or to introduce business, the ultimate responsibility for CDD measures should remain with the financial institution relying on the third party, which should be required to:

(a) obtain immediately the necessary information concerning elements (a)-(c) of the CDD measures set out in Recommendation 10;

(b) take steps to satisfy itself that copies of identification data and other relevant documentation relating to CDD requirements will be made available from the third party upon request without delay;

(c) satisfy itself that the third party is regulated, and supervised or monitored for, and has measures in place for compliance with, CDD and record-keeping requirements in line with Recommendations 10 and 11.

17.2 When determining in which countries the third party that meets the conditions can be based, countries should have regard to information available on the level of country risk.

17.3 For financial institutions that rely on a third party that is part of the same financial group, relevant competent authorities\(^{41}\) may also consider that the requirements of the criteria above are met in the following circumstances:

(a) the group applies CDD and record-keeping requirements, in line with Recommendations 10 to 12, and programmes against money laundering and terrorist financing, in accordance with Recommendation 18;

(b) the implementation of those CDD and record-keeping requirements and AML/CFT programmes is supervised at a group level by a competent authority; and

(c) any higher country risk is adequately mitigated by the group’s AML/CFT policies.

---

\(^{41}\) The term *relevant competent authorities* in Recommendation 17 means (i) the home authority, that should be involved for the understanding of group policies and controls at group-wide level, and (ii) the host authorities, that should be involved for the branches/subsidiaries.
RECOMMENDATION 18  INTERNAL CONTROLS AND FOREIGN BRANCHES AND SUBSIDIARIES

18.1 Financial institutions should be required to implement programmes against ML/TF, which have regard to the ML/TF risks and the size of the business, and which include the following internal policies, procedures and controls:

(a) compliance management arrangements (including the appointment of a compliance officer at the management level);
(b) screening procedures to ensure high standards when hiring employees;
(c) an ongoing employee training programme; and
(d) an independent audit function to test the system.

18.2 Financial groups should be required to implement group-wide programmes against ML/TF, which should be applicable, and appropriate to, all branches and majority-owned subsidiaries of the financial group. These should include the measures set out in criterion 18.1 and also:

(a) policies and procedures for sharing information required for the purposes of CDD and ML/TF risk management;
(b) the provision, at group-level compliance, audit, and/or AML/CFT functions, of customer, account, and transaction information from branches and subsidiaries when necessary for AML/CFT purposes; and
(c) adequate safeguards on the confidentiality and use of information exchanged.

18.3 Financial institutions should be required to ensure that their foreign branches and majority-owned subsidiaries apply AML/CFT measures consistent with the home country requirements, where the minimum AML/CFT requirements of the host country are less strict than those of the home country, to the extent that host country laws and regulations permit.

If the host country does not permit the proper implementation of AML/CFT measures consistent with the home country requirements, financial groups should be required to apply appropriate additional measures to manage the ML/TF risks, and inform their home supervisors.
19.1 Financial institutions should be required to apply enhanced due diligence, proportionate to the risks, to business relationships and transactions with natural and legal persons (including financial institutions) from countries for which this is called for by the FATF.

19.2 Countries should be able to apply countermeasures proportionate to the risks: (a) when called upon to do so by the FATF; and (b) independently of any call by the FATF to do so.

19.3 Countries should have measures in place to ensure that financial institutions are advised of concerns about weaknesses in the AML/CFT systems of other countries.
RECOMMENDATION 20  REPORTING OF SUSPICIOUS TRANSACTIONS

20.1 If a financial institution suspects or has reasonable grounds to suspect that funds are the proceeds of a criminal activity, or are related to TF, it should be required to report promptly its suspicions to the Financial Intelligence Unit.

20.2 Financial institutions should be required to report all suspicious transactions, including attempted transactions, regardless of the amount of the transaction.

42 The requirement that financial institutions should report suspicious transactions should be set out in law.

43 “Criminal activity” refers to: (a) all criminal acts that would constitute a predicate offence for ML in the country; or (b) at a minimum, to those offences that would constitute a predicate offence, as required by Recommendation 3.
21.1 Financial institutions and their directors, officers and employees should be protected by law from both criminal and civil liability for breach of any restriction on disclosure of information imposed by contract or by any legislative, regulatory or administrative provision, if they report their suspicions in good faith to the FIU. This protection should be available even if they did not know precisely what the underlying criminal activity was, and regardless of whether illegal activity actually occurred.

21.2 Financial institutions and their directors, officers and employees should be prohibited by law from disclosing the fact that an STR or related information is being filed with the Financial Intelligence Unit.
22.1 DNFBPs should be required to comply with the CDD requirements set out in Recommendation 10 in the following situations:

(a) Casinos – when customers engage in financial transactions equal to or above USD/EUR 3,000.

(b) Real estate agents – when they are involved in transactions for a client concerning the buying and selling of real estate.

(c) Dealers in precious metals and dealers in precious stones – when they engage in any cash transaction with a customer equal to or above USD/EUR 15,000.

(d) Lawyers, notaries, other independent legal professionals and accountants when they prepare for, or carry out, transactions for their client concerning the following activities:

- buying and selling of real estate;
- managing of client money, securities or other assets;
- management of bank, savings or securities accounts;
- organisation of contributions for the creation, operation or management of companies;
- creating, operating or management of legal persons or arrangements, and buying and selling of business entities.

(e) Trust and company service providers when they prepare for or carry out transactions for a client concerning the following activities:

- acting as a formation agent of legal persons;
- acting as (or arranging for another person to act as) a director or secretary of a company, a partner of a partnership, or a similar position in relation to other legal persons;
- providing a registered office, business address or accommodation, correspondence or administrative address for a company, a partnership or any other legal person or arrangement.

44 Conducting customer identification at the entry to a casino could be, but is not necessarily, sufficient. Countries must require casinos to ensure that they are able to link CDD information for a particular customer to the transactions that the customer conducts in the casino. "Financial transactions" does not refer to gambling transactions that involve only casino chips or tokens.

45 This means that real estate agents should comply with the requirements set out in Recommendation 10 with respect to both the purchasers and the vendors of the property.
- acting as (or arranging for another person to act as) a trustee of an express trust or performing the equivalent function for another form of legal arrangement;
- acting as (or arranging for another person to act as) a nominee shareholder for another person.

22.2 In the situations set out in Criterion 22.1, DNFBPs should be required to comply with the record-keeping requirements set out in Recommendation 11.

22.3 In the situations set out in Criterion 22.1, DNFBPs should be required to comply with the PEPs requirements set out in Recommendation 12.

22.4 In the situations set out in Criterion 22.1, DNFBPs should be required to comply with the new technologies requirements set out in Recommendation 15.

22.5 In the situations set out in Criterion 22.1, DNFBPs should be required to comply with the reliance on third-parties requirements set out in Recommendation 17.
**RECOMMENDATION 23**

**DNFBPS: OTHER MEASURES**

23.1 The requirements to report suspicious transactions set out in Recommendation 20 should apply to all DNFBPs subject to the following qualifications:

(a) Lawyers, notaries, other independent legal professionals and accountants – when, on behalf of, or for, a client, they engage in a financial transaction in relation to the activities described in criterion 22.1(d).

(b) Dealers in precious metals or stones – when they engage in a cash transaction with a customer equal to or above USD/EUR 15,000.

(c) Trust and company service providers – when, on behalf or for a client, they engage in a transaction in relation to the activities described in criterion 22.1(e).

23.2 In the situations set out in criterion 23.1, DNFBPs should be required to comply with the internal controls requirements set out in Recommendation 18.

23.3 In the situations set out in criterion 23.1, DNFBPs should be required to comply with the higher-risk countries requirements set out in Recommendation 19.

23.4 In the situations set out in criterion 23.1, DNFBPs should be required to comply with the tipping-off and confidentiality requirements set out in Recommendation 21.

---

46 Lawyers, notaries, other independent legal professionals, and accountants acting as independent legal professionals, are not required to report suspicious transactions if the relevant information was obtained in circumstances where they are subject to professional secrecy or legal professional privilege. It is for each country to determine the matters that would fall under legal professional privilege or professional secrecy. This would normally cover information lawyers, notaries or other independent legal professionals receive from or obtain through one of their clients: (a) in the course of ascertaining the legal position of their client, or (b) in performing their task of defending or representing that client in, or concerning judicial, administrative, arbitration or mediation proceedings.

47 Where countries allow lawyers, notaries, other independent legal professionals and accountants to send their STRs to their appropriate self-regulatory bodies (SRBs), there should be forms of co-operation between these bodies and the FIU.

48 Where lawyers, notaries, other independent legal professionals and accountants acting as independent legal professionals seek to dissuade a client from engaging in illegal activity, this does not amount to tipping-off.
RECOMMENDATION 24  TRANSPARENCY AND BENEFICIAL OWNERSHIP OF LEGAL PERSONS

24.1 Countries should have mechanisms that identify and describe: (a) the different types, forms and basic features of legal persons in the country; and (b) the processes for the creation of those legal persons, and for obtaining and recording of basic and beneficial ownership information. This information should be publicly available.

24.2 Countries should assess the ML/TF risks associated with all types of legal person created in the country.

Basic Information

24.3 Countries should require that all companies created in a country are registered in a company registry, which should record the company name, proof of incorporation, legal form and status, the address of the registered office, basic regulating powers, and a list of directors. This information should be publicly available.

24.4 Companies should be required to maintain the information set out in criterion 24.3, and also to maintain a register of their shareholders or members, containing the number of shares held by each shareholder and categories of shares (including the nature of the associated voting rights). This information should be maintained within the country at a location notified to the company registry.

24.5 Countries should have mechanisms that ensure that the information referred to in criteria 24.3 and 24.4 is accurate and updated on a timely basis.

Assessors should consider the application of all the criteria to all relevant types of legal persons. The manner in which these requirements are addressed may vary according to the type of legal person involved:

1. Companies - The measures required by Recommendation 24 are set out with specific reference to companies.

2. Foundations, Anstalt, and limited liability partnerships - countries should take similar measures and impose similar requirements as those required for companies, taking into account their different forms and structures.

3. Other types of legal persons - countries should take into account the different forms and structures of those other legal persons, and the levels of ML/TF risks associated with each type of legal person, with a view to achieving appropriate levels of transparency. At a minimum, all legal persons should ensure that similar types of basic information are recorded.

50 The register of shareholders and members can be recorded by the company itself or by a third person under the company’s responsibility.

51 In cases in which the company or company registry holds beneficial ownership information within the country, the register of shareholders and members need not be in the country, if the company can provide this information promptly on request.
Beneficial Ownership Information

24.6 Countries should use one or more of the following mechanisms to ensure that information on the beneficial ownership of a company is obtained by that company and available at a specified location in their country; or can be otherwise determined in a timely manner by a competent authority:

(a) requiring companies or company registries to obtain and hold up-to-date information on the companies’ beneficial ownership;

(b) requiring companies to take reasonable measures to obtain and hold up-to-date information on the companies’ beneficial ownership;

(c) using existing information, including: (i) information obtained by financial institutions and/or DNFBPs, in accordance with Recommendations 10 and 22; (ii) information held by other competent authorities on the legal and beneficial ownership of companies; (iii) information held by the company as required in criterion 24.3 above; and (iv) available information on companies listed on a stock exchange, where disclosure requirements ensure adequate transparency of beneficial ownership.

24.7 Countries should require that the beneficial ownership information is accurate and as up-to-date as possible.

24.8 Countries should ensure that companies co-operate with competent authorities to the fullest extent possible in determining the beneficial owner, by:

(a) requiring that one or more natural persons resident in the country is authorised by the company, and accountable to competent authorities, for providing all basic information and available beneficial ownership information, and giving further assistance to the authorities; and/or

(b) requiring that a DNFBP in the country is authorised by the company, and accountable to competent authorities, for providing all basic information and available beneficial ownership information, and giving further assistance to the authorities; and/or

(c) taking other comparable measures, specifically identified by the country.

24.9 All the persons, authorities and entities mentioned above, and the company itself (or its administrators, liquidators or other persons involved in the dissolution of the company), should be required to maintain the information and records referred to for at least five years after the date on which the company is dissolved or otherwise ceases to exist, or five years after the date on which the company ceases to be a customer of the professional intermediary or the financial institution.

Other Requirements

52 Members of the company’s board or senior management may not require specific authorisation by the company.
Competent authorities, and in particular law enforcement authorities, should have all the powers necessary to obtain timely access to the basic and beneficial ownership information held by the relevant parties.

Countries that have legal persons able to issue bearer shares or bearer share warrants should apply one or more of the following mechanisms to ensure that they are not misused for money laundering or terrorist financing:

(a) prohibiting bearer shares and share warrants; or
(b) converting bearer shares and share warrants into registered shares or share warrants (for example through dematerialisation); or
(c) immobilising bearer shares and share warrants by requiring them to be held with a regulated financial institution or professional intermediary; or
(d) requiring shareholders with a controlling interest to notify the company, and the company to record their identity; or
(e) using other mechanisms identified by the country.

Countries that have legal persons able to have nominee shares and nominee directors should apply one or more of the following mechanisms to ensure they are not misused:

(a) requiring nominee shareholders and directors to disclose the identity of their nominator to the company and to any relevant registry, and for this information to be included in the relevant register;
(b) requiring nominee shareholders and directors to be licensed, for their nominee status to be recorded in company registries, and for them to maintain information identifying their nominator, and make this information available to the competent authorities upon request; or
(c) using other mechanisms identified by the country.

There should be liability and proportionate and dissuasive sanctions, as appropriate for any legal or natural person that fails to comply with the requirements.

Countries should rapidly provide international co-operation in relation to basic and beneficial ownership information, on the basis set out in Recommendations 37 and 40. This should include:

(a) facilitating access by foreign competent authorities to basic information held by company registries;
(b) exchanging information on shareholders; and
(c) using their competent authorities' investigative powers, in accordance with their domestic law, to obtain beneficial ownership information on behalf of foreign counterparts.
Countries should monitor the quality of assistance they receive from other countries in response to requests for basic and beneficial ownership information or requests for assistance in locating beneficial owners residing abroad.
RECOMMENDATION 25  TRANSPARENCY AND BENEFICIAL OWNERSHIP OF LEGAL ARRANGEMENTS\textsuperscript{53}

25.1 Countries should require:

(a) trustees of any express trust governed under their law\textsuperscript{54} to obtain and hold adequate, accurate, and current information on the identity of the settlor, the trustee(s), the protector (if any), the beneficiaries or class of beneficiaries, and any other natural person exercising ultimate effective control over the trust;

(b) trustees of any trust governed under their law to hold basic information on other regulated agents of, and service providers to, the trust, including investment advisors or managers, accountants, and tax advisors; and

(c) professional trustees to maintain this information for at least five years after their involvement with the trust ceases.

25.2 Countries should require that any information held pursuant to this Recommendation is kept accurate and as up to date as possible, and is updated on a timely basis.

25.3 All countries should take measures to ensure that trustees disclose their status to financial institutions and DNFBPs when forming a business relationship or carrying out an occasional transaction above the threshold.

25.4 Trustees should not be prevented by law or enforceable means from providing competent authorities with any information relating to the trust\textsuperscript{55}; or from providing financial institutions and DNFBPs, upon request, with information on the beneficial ownership and the assets of the trust to be held or managed under the terms of the business relationship.

25.5 Competent authorities, and in particular law enforcement authorities, should have all the powers necessary to be able to obtain timely access to information held by trustees, and other parties (in particular information held by financial institutions and DNFBPs), on the beneficial ownership and control of the trust, including: (a) the beneficial ownership; (b) the residence of the trustee; and (c) any assets held or managed by the financial

\textsuperscript{53} The measures required by Recommendation 25 are set out with specific reference to trusts. This should be understood as referring to express trusts (as defined in the glossary). In relation to other types of legal arrangement with a similar structure or function, countries should take similar measures to those required for trusts, with a view to achieving similar levels of transparency. At a minimum, countries should ensure that information similar to that specified in respect of trusts should be recorded and kept accurate and current, and that such information is accessible in a timely way by competent authorities.

\textsuperscript{54} Countries are not required to give legal recognition to trusts. Countries need not include the requirements of Criteria 25.1; 25.2; 25.3; and 25.4 in legislation, provided that appropriate obligations to such effect exist for trustees (e.g. through common law or case law).

\textsuperscript{55} Domestic competent authorities or the relevant competent authorities of another country pursuant to an appropriate international cooperation request.
institution or DNFBP, in relation to any trustees with which they have a business relationship, or for which they undertake an occasional transaction.

25.6 Countries should rapidly provide international co-operation in relation to information, including beneficial ownership information, on trusts and other legal arrangements, on the basis set out in Recommendations 37 and 40. This should include:

(a) facilitating access by foreign competent authorities to basic information held by registries or other domestic authorities;

(b) exchanging domestically available information on the trusts or other legal arrangement; and

(c) using their competent authorities’ investigative powers, in accordance with domestic law, in order to obtain beneficial ownership information on behalf of foreign counterparts.

25.7 Countries should ensure that trustees are either (a) legally liable for any failure to perform the duties relevant to meeting their obligations; or (b) that there are proportionate and dissuasive sanctions, whether criminal, civil or administrative, for failing to comply.\(^{56}\)

25.8 Countries should ensure that there are proportionate and dissuasive sanctions, whether criminal, civil or administrative, for failing to grant to competent authorities timely access to information regarding the trust referred to in criterion 25.1.

\(^{56}\) This does not affect the requirements for proportionate and dissuasive sanctions for failure to comply with requirements elsewhere in the Recommendations.
RECOMMENDATION 26

REGULATION AND SUPERVISION OF FINANCIAL INSTITUTIONS

26.1 Countries should designate one or more supervisors that have responsibility for regulating and supervising (or monitoring) financial institutions’ compliance with the AML/CFT requirements.

Market Entry

26.2 Core Principles financial institutions should be required to be licensed. Other financial institutions, including those providing a money or value transfer service or a money or currency changing service, should be licensed or registered. Countries should not approve the establishment, or continued operation, of shell banks.

26.3 Competent authorities or financial supervisors should take the necessary legal or regulatory measures to prevent criminals or their associates from holding (or being the beneficial owner of) a significant or controlling interest, or holding a management function, in a financial institution.

Risk-based approach to supervision and monitoring

26.4 Financial institutions should be subject to:

(a) for core principles institutions - regulation and supervision in line with the core principles\(^\text{57}\), where relevant for AML/CFT, including the application of consolidated group supervision for AML/CFT purposes.

(b) for all other financial institutions - regulation and supervision or monitoring having regard to the ML/TF risks in that sector. At a minimum, for financial institutions providing a money or value transfer service, or a money or currency changing service - systems for monitoring and ensuring compliance with national AML/CFT requirements.

26.5 The frequency and intensity of on-site and off-site AML/CFT supervision of financial institutions or groups should be determined on the basis of:

(a) the ML/TF risks and the policies, internal controls and procedures associated with the institution or group, as identified by the supervisor’s assessment of the institution’s or group’s risk profile;

(b) the ML/TF risks present in the country; and

\(^{57}\) The Core Principles which are relevant to AML/CFT include: Basel Committee on Banking Supervision (BCBS) Principles 1, 2, 3, 5-9, 11-15, 26, and 29; International Association of Insurance Supervisors (IAIS) Principles 1, 3-11 18, 21-23, and 25; and International Organization of Securities Commission (IOSCO) Principles 24, 28, 29 and 31; and Responsibilities A, B, C and D. Assessors may refer to existing assessments of the country’s compliance with these Core Principles, where available.
(c) the characteristics of the financial institutions or groups, in particular the diversity and number of financial institutions and the degree of discretion allowed to them under the risk-based approach.

26.6 The supervisor should review the assessment of the ML/TF risk profile of a financial institution or group (including the risks of non-compliance) periodically, and when there are major events or developments in the management and operations of the financial institution or group.
### RECOMMENDATION 27

#### POWERS OF SUPERVISORS

27.1 Supervisors should have powers to supervise or monitor and ensure compliance by financial institutions with AML/CFT requirements.

27.2 Supervisors should have the authority to conduct inspections of financial institutions.

27.3 Supervisors should be authorised to compel\(^{58}\) production of any information relevant to monitoring compliance with the AML/CFT requirements.

27.4 Supervisors should be authorised to impose sanctions in line with Recommendation 35 for failure to comply with the AML/CFT requirements. This should include powers to impose a range of disciplinary and financial sanctions, including the power to withdraw, restrict or suspend the financial institution’s licence.

---

\(^{58}\) The supervisor’s power to compel production of or to obtain access for supervisory purposes should not be predicated on the need to require a court order.
RECOMMENDATION 28  REGULATION AND SUPERVISION OF DNFBPs

Casinos

28.1 Countries should ensure that casinos are subject to AML/CFT regulation and supervision. At a minimum:

(a) Countries should require casinos to be licensed.

(b) Competent authorities should take the necessary legal or regulatory measures to prevent criminals or their associates from holding (or being the beneficial owner of) a significant or controlling interest, or holding a management function, or being an operator of a casino.

(c) Casinos should be supervised for compliance with AML/CFT requirements.

DNFBPs other than casinos

28.2 There should be a designated competent authority or SRB responsible for monitoring and ensuring compliance of DNFBPs with AML/CFT requirements.

28.3 Countries should ensure that the other categories of DNFBPs are subject to systems for monitoring compliance with AML/CFT requirements.

28.4 The designated competent authority or self-regulatory body (SRB) should:

(a) have adequate powers to perform its functions, including powers to monitor compliance;

(b) take the necessary measures to prevent criminals or their associates from being professionally accredited, or holding (or being the beneficial owner of) a significant or controlling interest, or holding a management function in a DNFBP; and

(c) have sanctions available in line with Recommendation 35 to deal with failure to comply with AML/CFT requirements.

All DNFBPs

28.5 Supervision of DNFBPs should be performed on a risk-sensitive basis, including:

(a) determining the frequency and intensity of AML/CFT supervision of DNFBPs on the basis of their understanding of the ML/TF risks, taking into consideration the characteristics of the DNFBPs, in particular their diversity and number; and

(b) taking into account the ML/TF risk profile of those DNFBPs, and the degree of discretion allowed to them under the risk-based approach, when assessing the adequacy of the AML/CFT internal controls, policies and procedures of DNFBPs.
29.1 Countries should establish an FIU with responsibility for acting as a national centre for receipt and analysis of suspicious transaction reports and other information relevant to money laundering, associated predicate offences and terrorist financing; and for the dissemination of the results of that analysis.59

29.2 The FIU should serve as the central agency for the receipt of disclosures filed by reporting entities, including:

(a) Suspicious transaction reports filed by reporting entities as required by Recommendation 20 and 23; and

(b) any other information as required by national legislation (such as cash transaction reports, wire transfers reports and other threshold-based declarations/disclosures).

29.3 The FIU should:

(a) in addition to the information that entities report to the FIU, be able to obtain and use additional information from reporting entities, as needed to perform its analysis properly; and

(b) have access to the widest possible range60 of financial, administrative and law enforcement information that it requires to properly undertake its functions.

29.4 The FIU should conduct:

(a) operational analysis, which uses available and obtainable information to identify specific targets, to follow the trail of particular activities or transactions, and to determine links between those targets and possible proceeds of crime, money laundering, predicate offences and terrorist financing; and

(b) strategic analysis, which uses available and obtainable information, including data that may be provided by other competent authorities, to identify money laundering and terrorist financing related trends and patterns.

29.5 The FIU should be able to disseminate, spontaneously and upon request, information and the results of its analysis to relevant competent authorities, and should use dedicated, secure and protected channels for the dissemination.

29.6 The FIU should protect information by:

---

59 Considering that there are different FIU models, Recommendation 29 does not prejudge a country’s choice for a particular model, and applies equally to all of them.

60 This should include information from open or public sources, as well as relevant information collected and/or maintained by, or on behalf of, other authorities and, where appropriate commercially held data.
(a) having rules in place governing the security and confidentiality of information, including procedures for handling, storage, dissemination, and protection of, and access to, information;

(b) ensuring that FIU staff members have the necessary security clearance levels and understanding of their responsibilities in handling and disseminating sensitive and confidential information; and

(c) ensuring that there is limited access to its facilities and information, including information technology systems.

29.7 The FIU should be operationally independent and autonomous, by:

(a) having the authority and capacity to carry out its functions freely, including the autonomous decision to analyse, request and/or forward or disseminate specific information;

(b) being able to make arrangements or engage independently with other domestic competent authorities or foreign counterparts on the exchange of information;

(c) when it is located within the existing structure of another authority, having distinct core functions from those of the other authority; and

(d) being able to obtain and deploy the resources needed to carry out its functions, on an individual or routine basis, free from any undue political, government or industry influence or interference, which might compromise its operational independence.

29.8 Where a country has created an FIU and is not an Egmont Group member, the FIU should apply for membership in the Egmont Group. The FIU should submit an unconditional application for membership to the Egmont Group and fully engage itself in the application process.
30.1 There should be designated law enforcement authorities that have responsibility for ensuring that money laundering, associated predicate offences and terrorist financing offences are properly investigated, within the framework of national AML/CFT policies.

30.2 Law enforcement investigators of predicate offences should either be authorised to pursue the investigation of any related ML/TF offences during a parallel financial investigation[^61], or be able to refer the case to another agency to follow up with such investigations, regardless of where the predicate offence occurred.

30.3 There should be one or more designated competent authorities to expeditiously identify, trace, and initiate freezing and seizing of property that is, or may become, subject to confiscation, or is suspected of being proceeds of crime.

30.4 Countries should ensure that Recommendation 30 also applies to those competent authorities, which are not law enforcement authorities, *per se*, but which have the responsibility for pursuing financial investigations of predicate offences, to the extent that these competent authorities are exercising functions covered under Recommendation 30.

30.5 If anti-corruption enforcement authorities are designated to investigate ML/TF offences arising from, or related to, corruption offences under Recommendation 30, they should also have sufficient powers to identify, trace, and initiate freezing and seizing of assets.

[^61]: A *parallel financial investigation* refers to conducting a financial investigation alongside, or in the context of, a (traditional) criminal investigation into money laundering, terrorist financing and/or predicate offence(s).

A *financial investigation* means an enquiry into the financial affairs related to a criminal activity, with a view to: (i) identifying the extent of criminal networks and/or the scale of criminality; (ii) identifying and tracing the proceeds of crime, terrorist funds or any other assets that are, or may become, subject to confiscation; and (iii) developing evidence which can be used in criminal proceedings.
31.1 Competent authorities conducting investigations of money laundering, associated predicate offences and terrorist financing should be able to obtain access to all necessary documents and information for use in those investigations, and in prosecutions and related actions. This should include powers to use compulsory measures for:

(a) the production of records held by financial institutions, DNFBPs and other natural or legal persons;
(b) the search of persons and premises;
(c) taking witness statements; and
(d) seizing and obtaining evidence.

31.2 Competent authorities conducting investigations should be able to use a wide range of investigative techniques for the investigation of money laundering, associated predicate offences and terrorist financing, including:

(a) undercover operations;
(b) intercepting communications;
(c) accessing computer systems; and
(d) controlled delivery.

31.3 Countries should have mechanisms in place:

(a) to identify, in a timely manner, whether natural or legal persons hold or control accounts; and

(b) to ensure that competent authorities have a process to identify assets without prior notification to the owner.

31.4 Competent authorities conducting investigations of money laundering, associated predicate offences and terrorist financing should be able to ask for all relevant information held by the FIU.
Note to Assessors:
Recommendation 32 may be implemented on a supra-national basis by a supra-national jurisdiction, such that only movements that cross the external borders of the supra-national jurisdiction are considered to be cross-border for the purposes of Recommendation 32. Such arrangements are assessed on a supra-national basis, on the basis set out in Annex I.

32.1 Countries should implement a declaration system or a disclosure system for incoming and outgoing cross-border transportation of currency and bearer negotiable instruments (BNIs). Countries should ensure that a declaration or disclosure is required for all physical cross-border transportation, whether by travellers or through mail and cargo, but may use different systems for different modes of transportation.

32.2 In a declaration system, all persons making a physical cross-border transportation of currency or BNIs, which are of a value exceeding a pre-set, maximum threshold of USD/EUR 15 000, should be required to submit a truthful declaration to the designated competent authorities. Countries may opt from among the following three different types of declaration system:

(a) A written declaration system for all travellers;
(b) A written declaration system for all travellers carrying amounts above a threshold; and/or
(c) An oral declaration system for all travellers.

32.3 In a disclosure system, travellers should be required to give a truthful answer and provide the authorities with appropriate information upon request, but are not required to make an upfront written or oral declaration.

32.4 Upon discovery of a false declaration or disclosure of currency or BNIs or a failure to declare or disclose them, designated competent authorities should have the authority to request and obtain further information from the carrier with regard to the origin of the currency or BNIs, and their intended use.

32.5 Persons who make a false declaration or disclosure should be subject to proportionate and dissuasive sanctions, whether criminal, civil or administrative.

32.6 Information obtained through the declaration/disclosure process should be available to the FIU either through: (a) a system whereby the FIU is notified about suspicious cross-border transportation incidents; or (b) by making the declaration/disclosure information directly available to the FIU in some other way.

32.7 At the domestic level, countries should ensure that there is adequate co-ordination among customs, immigration and other related authorities on issues related to the implementation of Recommendation 32.
32.8 Competent authorities should be able to stop or restrain currency or BNIs for a reasonable time in order to ascertain whether evidence of ML/TF may be found in cases:

(a) where there is a suspicion of ML/TF or predicate offences; or
(b) where there is a false declaration or false disclosure.

32.9 Countries should ensure that the declaration/disclosure system allows for international co-operation and assistance, in accordance with Recommendations 36 to 40. To facilitate such co-operation, information\textsuperscript{62} shall be retained when:

(a) a declaration or disclosure which exceeds the prescribed threshold is made; or
(b) there is a false declaration or false disclosure; or
(c) there is a suspicion of ML/TF.

32.10 Countries should ensure that strict safeguards exist to ensure proper use of information collected through the declaration/disclosure systems, without restricting either: (i) trade payments between countries for goods and services; or (ii) the freedom of capital movements, in any way.

32.11 Persons who are carrying out a physical cross-border transportation of currency or BNIs that are related to ML/TF or predicate offences should be subject to: (a) proportionate and dissuasive sanctions, whether criminal, civil or administrative; and (b) measures consistent with Recommendation 4 which would enable the confiscation of such currency or BNIs.

\textsuperscript{62} At a minimum, the information should set out (i) the amount of currency or BNIs declared, disclosed or otherwise detected, and (ii) the identification data of the bearer(s).
33.1 Countries should maintain comprehensive statistics on matters relevant to the effectiveness and efficiency of their AML/CFT systems. This should include keeping statistics on:

(a) STRs, received and disseminated;
(b) ML/TF investigations, prosecutions and convictions;
(c) Property frozen; seized and confiscated; and
(d) Mutual legal assistance or other international requests for co-operation made and received.
34.1 Competent authorities, supervisors, and SRBs should establish guidelines and provide feedback, which will assist financial institutions and DNFBPs in applying national AML/CFT measures, and in particular, in detecting and reporting suspicious transactions.
35.1 Countries should ensure that there is a range of proportionate and dissuasive sanctions, whether criminal, civil or administrative, available to deal with natural or legal persons that fail to comply with the AML/CFT requirements of Recommendations 6, and 8 to 23.63

35.2 Sanctions should be applicable not only to financial institutions and DNFBPs but also to their directors and senior management.

63 The sanctions should be directly or indirectly applicable for a failure to comply. They need not be in the same document that imposes or underpins the requirement, and can be in another document, provided there are clear links between the requirement and the available sanctions.
36.1 Countries should become a party to the Vienna Convention, the Palermo Convention, the United Nations Convention against Corruption (the Merida Convention) and the Terrorist Financing Convention.

36.2 Countries should fully implement the Vienna Convention, the Palermo Convention, the Merida Convention and the Terrorist Financing Convention.

64 The relevant articles are: the Vienna Convention (Articles 3-11, 15, 17 and 19), the Palermo Convention (Articles 5-7, 10-16, 18-20, 24-27, 29-31, & 34), the Merida Convention (Articles 14-17, 23-24, 26-31, 38, 40, 43-44, 46, 48, 50-55, 57-58), and the Terrorist Financing Convention (Articles 2-18).
37.1 Countries should have a legal basis that allows them to rapidly provide the widest possible range of mutual legal assistance in relation to money laundering, associated predicate offences and terrorist financing investigations, prosecutions and related proceedings.

37.2 Countries should use a central authority, or another established official mechanism, for the transmission and execution of requests. There should be clear processes for the timely prioritisation and execution of mutual legal assistance requests. To monitor progress on requests, a case management system should be maintained.

37.3 Mutual legal assistance should not be prohibited or made subject to unreasonable or unduly restrictive conditions.

37.4 Countries should not refuse a request for mutual legal assistance:

(a) on the sole ground that the offence is also considered to involve fiscal matters; or

(b) on the grounds of secrecy or confidentiality requirements on financial institutions or DNFBPs, except where the relevant information that is sought is held in circumstances where legal professional privilege or legal professional secrecy applies.

37.5 Countries should maintain the confidentiality of mutual legal assistance requests that they receive and the information contained in them, subject to fundamental principles of domestic law, in order to protect the integrity of the investigation or inquiry.

37.6 Where mutual legal assistance requests do not involve coercive actions, countries should not make dual criminality a condition for rendering assistance.

37.7 Where dual criminality is required for mutual legal assistance, that requirement should be deemed to be satisfied regardless of whether both countries place the offence within the same category of offence, or denominate the offence by the same terminology, provided that both countries criminalise the conduct underlying the offence.

37.8 Powers and investigative techniques that are required under Recommendation 31 or otherwise available to domestic competent authorities should also be available for use in response to requests for mutual legal assistance, and, if consistent with the domestic framework, in response to a direct request from foreign judicial or law enforcement authorities to domestic counterparts. These should include:

(a) all of the specific powers required under Recommendation 31 relating to the production, search and seizure of information, documents, or evidence (including financial records) from financial institutions, or other natural or legal persons, and the taking of witness statements; and

(b) a broad range of other powers and investigative techniques.
38.1 Countries should have the authority to take expeditious action in response to requests by foreign countries to identify, freeze, seize, or confiscate:

(a) laundered property from,
(b) proceeds from,
(c) instrumentalities used in, or
(d) instrumentalities intended for use in, money laundering, predicate offences, or terrorist financing; or
(e) property of corresponding value.

38.2 Countries should have the authority to provide assistance to requests for co-operation made on the basis of non-conviction based confiscation proceedings and related provisional measures, at a minimum in circumstances when a perpetrator is unavailable by reason of death, flight, absence, or the perpetrator is unknown, unless this is inconsistent with fundamental principles of domestic law.

38.3 Countries should have: (a) arrangements for co-ordinating seizure and confiscation actions with other countries; and (b) mechanisms for managing, and when necessary disposing of, property frozen, seized or confiscated.

38.4 Countries should be able to share confiscated property with other countries, in particular when confiscation is directly or indirectly a result of co-ordinated law enforcement actions.
39.1 Countries should be able to execute extradition requests in relation to ML/TF without undue delay. In particular, countries should:

(a) ensure ML and TF are extraditable offences;
(b) ensure that they have a case management system, and clear processes for the timely execution of extradition requests including prioritisation where appropriate; and
(c) not place unreasonable or unduly restrictive conditions on the execution of requests.

39.2 Countries should either:

(a) extradite their own nationals; or
(b) where they do not do so solely on the grounds of nationality, should, at the request of the country seeking extradition, submit the case without undue delay to its competent authorities for the purpose of prosecution of the offences set forth in the request.

39.3 Where dual criminality is required for extradition, that requirement should be deemed to be satisfied regardless of whether both countries place the offence within the same category of offence, or denominate the offence by the same terminology, provided that both countries criminalise the conduct underlying the offence.

39.4 Consistent with fundamental principles of domestic law, countries should have simplified extradition mechanisms\(^{65}\) in place.

---

\(^{65}\) Such as allowing direct transmission of requests for provisional arrests between appropriate authorities, extraditing persons based only on warrants of arrests or judgments, or introducing a simplified extradition of consenting persons who waive formal extradition proceedings.
RECOMMENDATION 40
OTHER FORMS OF INTERNATIONAL CO-OPERATION

General Principles

40.1 Countries should ensure that their competent authorities can rapidly provide the widest range of international co-operation in relation to money laundering, associated predicate offences and terrorist financing. Such exchanges of information should be possible both spontaneously and upon request.

40.2 Competent authorities should:
   (a) have a lawful basis for providing co-operation;
   (b) be authorised to use the most efficient means to co-operate;
   (c) have clear and secure gateways, mechanisms or channels that will facilitate and allow for the transmission and execution of requests;
   (d) have clear processes for the prioritisation and timely execution of requests; and
   (e) have clear processes for safeguarding the information received.

40.3 Where competent authorities need bilateral or multilateral agreements or arrangements to co-operate, these should be negotiated and signed in a timely way, and with the widest range of foreign counterparts.

40.4 Upon request, requesting competent authorities should provide feedback in a timely manner to competent authorities from which they have received assistance, on the use and usefulness of the information obtained.

40.5 Countries should not prohibit, or place unreasonable or unduly restrictive conditions on, the provision of exchange of information or assistance. In particular, competent authorities should not refuse a request for assistance on the grounds that:
   (a) the request is also considered to involve fiscal matters; and/or
   (b) laws require financial institutions or DNFBPs to maintain secrecy or confidentiality (except where the relevant information that is sought is held in circumstances where legal professional privilege or legal professional secrecy applies); and/or
   (c) there is an inquiry, investigation or proceeding underway in the requested country, unless the assistance would impede that inquiry, investigation or proceeding; and/or
   (d) the nature or status (civil, administrative, law enforcement, etc.) of the requesting counterpart authority is different from that of its foreign counterpart.

40.6 Countries should establish controls and safeguards to ensure that information exchanged by competent authorities is used only for the purpose for, and by the authorities, for
which the information was sought or provided, unless prior authorisation has been given by the requested competent authority.

40.7 Competent authorities should maintain appropriate confidentiality for any request for co-operation and the information exchanged, consistent with both parties’ obligations concerning privacy and data protection. At a minimum, competent authorities should protect exchanged information in the same manner as they would protect similar information received from domestic sources. Competent authorities should be able to refuse to provide information if the requesting competent authority cannot protect the information effectively.

40.8 Competent authorities should be able to conduct inquiries on behalf of foreign counterparts, and exchange with their foreign counterparts all information that would be obtainable by them if such inquiries were being carried out domestically.

Exchange of Information between FIUs

40.9 FIUs should have an adequate legal basis for providing co-operation on money laundering, associated predicate offences and terrorist financing.\(^\text{66}\)

40.10 FIUs should provide feedback to their foreign counterparts, upon request and whenever possible, on the use of the information provided, as well as on the outcome of the analysis conducted, based on the information provided.

40.11 FIUs should have the power to exchange:

(a) all information required to be accessible or obtainable directly or indirectly by the FIU, in particular under Recommendation 29; and

(b) any other information which they have the power to obtain or access, directly or indirectly, at the domestic level, subject to the principle of reciprocity.

Exchange of information between financial supervisors\(^\text{67}\)

40.12 Financial supervisors should have a legal basis for providing co-operation with their foreign counterparts (regardless of their respective nature or status), consistent with the applicable international standards for supervision, in particular with respect to the exchange of supervisory information related to or relevant for AML/CFT purposes.

40.13 Financial supervisors should be able to exchange with foreign counterparts information domestically available to them, including information held by financial institutions, in a manner proportionate to their respective needs.

\(^{66}\) FIUs should be able to provide cooperation regardless of whether their counterpart FIU is administrative, law enforcement, judicial or other in nature.

\(^{67}\) This refers to financial supervisors which are competent authorities and does not include financial supervisors which are SRBs.
40.14 Financial supervisors should be able to exchange the following types of information when relevant for AML/CFT purposes, in particular with other supervisors that have a shared responsibility for financial institutions operating in the same group:

(a) regulatory information, such as information on the domestic regulatory system, and general information on the financial sectors;

(b) prudential information, in particular for Core Principles supervisors, such as information on the financial institution's business activities, beneficial ownership, management, and fit and properness; and

(c) AML/CFT information, such as internal AML/CFT procedures and policies of financial institutions, customer due diligence information, customer files, samples of accounts and transaction information.

40.15 Financial supervisors should be able to conduct inquiries on behalf of foreign counterparts, and, as appropriate, to authorise or facilitate the ability of foreign counterparts to conduct inquiries themselves in the country, in order to facilitate effective group supervision.

40.16 Financial supervisors should ensure that they have the prior authorisation of the requested financial supervisor for any dissemination of information exchanged, or use of that information for supervisory and non-supervisory purposes, unless the requesting financial supervisor is under a legal obligation to disclose or report the information. In such cases, at a minimum, the requesting financial supervisor should promptly inform the requested authority of this obligation.

*Exchange of information between law enforcement authorities*

40.17 Law enforcement authorities should be able to exchange domestically available information with foreign counterparts for intelligence or investigative purposes relating to money laundering, associated predicate offences or terrorist financing, including the identification and tracing of the proceeds and instrumentalities of crime.

40.18 Law enforcement authorities should also be able to use their powers, including any investigative techniques available in accordance with their domestic law, to conduct inquiries and obtain information on behalf of foreign counterparts. The regimes or practices in place governing such law enforcement co-operation, such as the agreements between Interpol, Europol or Eurojust and individual countries, should govern any restrictions on use imposed by the requested law enforcement authority.

40.19 Law enforcement authorities should be able to form joint investigative teams to conduct cooperative investigations, and, when necessary, establish bilateral or multilateral arrangements to enable such joint investigations.
Exchange of information between non-counterparts

40.20 Countries should permit their competent authorities to exchange information indirectly\(^{68}\) with non-counterparts, applying the relevant principles above. Countries should ensure that the competent authority that requests information indirectly always makes it clear for what purpose and on whose behalf the request is made.

---

\(^{68}\) Indirect exchange of information refers to the requested information passing from the requested authority through one or more domestic or foreign authorities before being received by the requesting authority. Such an exchange of information and its use may be subject to the authorisation of one or more competent authorities of the requested country.
EFFECTIVENESS ASSESSMENT

Immediate Outcome 1

Money laundering and terrorist financing risks are understood and, where appropriate, actions co-ordinated domestically to combat money laundering and the financing of terrorism and proliferation.

Characteristics of an effective system

A country properly identifies, assesses and understands its money laundering and terrorist financing risks, and co-ordinates domestically to put in place actions to mitigate these risks. This includes the involvement of competent authorities and other relevant authorities; using a wide range of reliable information sources; using the assessment(s) of risks as a basis for developing and prioritising AML/CFT policies and activities; and communicating and implementing those policies and activities in a co-ordinated way across appropriate channels. The relevant competent authorities also co-operate, and co-ordinate policies and activities to combat the financing of proliferation. Over time, this results in substantial mitigation of money laundering and terrorist financing risks.

This outcome relates primarily to Recommendations 1, 2 and 34.

Note to Assessors:

1) Assessors are not expected to conduct an in-depth review of, or assess the country’s assessment(s) of risks. Assessors, based on their views of the reasonableness of the assessment(s) of risks, should focus on how well the competent authorities use their understanding of the risks in practice to inform policy development and actions to mitigate the risks.

2) Assessors should take into consideration their findings for this Immediate Outcome (IO) in their assessment of the other IOs. However, assessors should only let their findings relating to the co-operation and co-ordination of measures to combat the financing of proliferation affect the assessments of IO.11 and not of the other IOs. (i.e. IO.2 to IO.10) that deal with combating money laundering and terrorist financing.

Core Issues to be considered in determining if the Outcome is being achieved

1.1. How well does the country understand its ML/TF risks?

1.2. How well are the identified ML/TF risks addressed by national AML/CFT policies and activities?
1.3. To what extent are the results of the assessment(s) of risks properly used to justify exemptions and support the application of enhanced measures for higher risk scenarios, or simplified measures for lower risk scenarios?

1.4. To what extent are the objectives and activities of the competent authorities and SRBs consistent with the evolving national AML/CFT policies and with the ML/TF risks identified?

1.5. To what extent do the competent authorities and SRBs co-operate and co-ordinate the development and implementation of policies and activities to combat ML/TF and, where appropriate, the financing of proliferation of weapons of mass destruction?

1.6. To what extent does the country ensure that respective financial institutions, DNFBPs and other sectors affected by the application of the FATF Standards are aware of the relevant results of the national ML/TF risks?

a) Examples of Information that could support the conclusions on Core Issues

1. The country’s assessment(s) of its ML/TF risks (e.g., types of assessment(s) produced; types of assessment(s) published / communicated).

2. AML/CFT policies and strategies (e.g., AML/CFT policies, strategies and statements communicated/published; engagement and commitment at the senior officials and political level).

3. Outreach activities to private sector and relevant authorities (e.g., briefings and guidance on relevant conclusions from risk assessment(s); frequency and relevancy of consultation on policies and legislation, input to develop risk assessment(s) and other policy products).

b) Examples of Specific Factors that could support the conclusions on Core Issues

4. What are the methods, tools, and information used to develop, review and evaluate the conclusions of the assessment(s) of risks? How comprehensive are the information and data used?

5. How useful are strategic financial intelligence, analysis, typologies, and guidance?

6. Which competent authorities and relevant stakeholders (including financial institutions and DNFBPs) are involved in the assessment(s) of risks? How do they provide inputs to the national level ML/TF assessment(s) of risks, and at what stage?

7. Is the assessment(s) of risks kept up-to-date, reviewed regularly and responsive to significant events or developments (including new threats and trends)?

8. To what extent is the assessment(s) of risks reasonable and consistent with the ML/TF threats, vulnerabilities and specificities faced by the country? Where appropriate, does it take into account risks identified by other credible sources?

9. Do the policies of competent authorities respond to changing ML/TF risks?

10. What mechanism(s) or body do the authorities use to ensure proper and regular co-operation and co-ordination of the national framework and development and
implementation of policies to combat ML/TF, at both policymaking and operational levels, and where relevant, the financing of proliferation of weapons of mass destruction? Does the mechanism or body include all relevant authorities?

11. Are there adequate resources and expertise involved in conducting the assessment(s) of risks, and for domestic co-operation and co-ordination?
Immediate Outcome 2

International co-operation delivers appropriate information, financial intelligence, and evidence, and facilitates action against criminals and their assets.

**Characteristics of an effective system**

The country provides constructive and timely information or assistance when requested by other countries. Competent authorities assist with requests to:

- locate and extradite criminals; and
- identify, freeze, seize, confiscate and share assets and provide information (including evidence, financial intelligence, supervisory and beneficial ownership information) related to money laundering, terrorist financing or associated predicate offences.

Competent authorities also seek international co-operation to pursue criminals and their assets. Over time, this makes the country an unattractive location for criminals (including terrorists) to operate in, maintain their illegal proceeds in, or use as a safe haven.

This outcome relates primarily to Recommendations 36 - 40 and also elements of Recommendations 9, 24, 25 and 32.

**Note to Assessors:**

Assessors should take into consideration how their findings on the specific role of relevant competent authorities in seeking and delivering international co-operation under this IO would impact other IOs (particularly IO.3, IO.5, IOs. 6 to 10) including how the country seeks international co-operation with respect to domestic cases when appropriate.

**Core Issues to be considered in determining if the Outcome is being achieved**

2.1. To what extent has the country provided constructive and timely mutual legal assistance and extradition across the range of international co-operation requests? What is the quality of such assistance provided?

2.2. To what extent has the country sought legal assistance for international co-operation in an appropriate and timely manner to pursue domestic ML, associated predicate offences and TF cases which have transnational elements?

2.3. To what extent do the different competent authorities seek other forms of international co-operation to exchange financial intelligence and supervisory, law enforcement or other information in an appropriate and timely manner with their foreign counterparts for AML/CFT purposes?
2.4. To what extent do the different competent authorities provide (including spontaneously) other forms of international co-operation to exchange financial intelligence and supervisory, law enforcement or other information in a constructive and timely manner with their foreign counterparts for AML/CFT purposes?

2.5. How well are the competent authorities providing and responding to foreign requests for co-operation in identifying and exchanging basic and beneficial ownership information of legal persons and arrangements?

a) Examples of Information that could support the conclusions on Core Issues

1. Evidence of handling and making requests for international co-operation with respect to extradition, mutual legal assistance and other forms of international co-operation (e.g., number of requests made, received, processed, granted, or refused relating to different competent authorities (e.g., central authority, FIU, supervisors, and law enforcement agencies) and types of request; timeliness of response, including prioritisation of requests; cases of spontaneous dissemination / exchange).

2. Types and number of co-operation arrangements with other countries (including bilateral and multilateral MOUs, treaties, co-operation based on reciprocity, or other co-operation mechanisms).

3. Examples of: (a) making, and (b) providing successful international co-operation (e.g., making use of financial intelligence / evidence provided to or by the country (as the case may be); investigations conducted on behalf or jointly with foreign counterparts; extradition of suspects/criminals for ML/TF).

4. Information on investigations, prosecutions, confiscation and repatriation/sharing of assets (e.g., number of ML/TF investigations/ prosecutions, number and value of assets frozen and confiscated (including non-conviction-based confiscation) arising from international co-operation; value of assets repatriated or shared).

b) Examples of Specific Factors that could support the conclusions on Core Issues

5. What operational measures are in place to ensure that appropriate safeguards are applied, requests are handled in a confidential manner to protect the integrity of the process (e.g., investigations and inquiry), and information exchanged is used for authorised purposes?

6. What mechanisms (including case management systems) are used among the different competent authorities to receive, assess, prioritise and respond to requests for assistance?

7. What are the reasons for refusal in cases where assistance is not or cannot be provided?

8. What mechanisms (including case management systems) are used among the different competent authorities to select, prioritise and make requests for assistance?

9. How do different competent authorities ensure that relevant and accurate information is provided to the requested country to allow it to understand and assess the requests?
10. How well has the country worked with the requesting or requested country to avoid or resolve conflicts of jurisdiction or problems caused by poor quality information in requests?

11. How do competent authorities ensure that details of the contact persons and requirements for international co-operation requests are clear and easily available to requesting countries?

12. To what extent does the country prosecute its own nationals without undue delay in situations when it is unable by law to extradite them?

13. What measures and arrangements are in place to manage and repatriate assets confiscated at the request of other countries?

14. Are there aspects of the legal, operational or judicial process (e.g., excessively strict application of dual criminality requirements etc.) that impede or hinder international co-operation?

15. To what extent are competent authorities exchanging information, indirectly, with non-counterparts?

16. Are adequate resources available for: (a) receiving, managing, coordinating and responding to incoming requests for co-operation; and (b) making and coordinating requests for assistance in a timely manner?
Immediate Outcome 3

Supervisors appropriately supervise, monitor and regulate financial institutions and DNFBPs for compliance with AML/CFT requirements commensurate with their risks.

Characteristics of an effective system

Supervision and monitoring address and mitigate the money laundering and terrorist financing risks in the financial and other relevant sectors by:

- preventing criminals and their associates from holding, or being the beneficial owner of, a significant or controlling interest or a management function in financial institutions or DNFBPs; and
- promptly identifying, remediying, and sanctioning, where appropriate, violations of AML/CFT requirements or failings in money laundering and terrorist financing risk management.

Supervisors provide financial institutions and DNFBPs with adequate feedback and guidance on compliance with AML/CFT requirements. Over time, supervision and monitoring improve the level of AML/CFT compliance, and discourage attempts by criminals to abuse the financial and DNFBP sectors, particularly in the sectors most exposed to money laundering and terrorist financing risks.

This outcome relates primarily to Recommendations 14, 26 to 28, 34 and 35, and also elements of Recommendations 1 and 40.

Note to Assessors:

Assessors should also consider the relevant findings, including at the financial group level, the level of international co-operation which supervisors are participating in when assessing this IO.

Core Issues to be considered in determining if the Outcome is being achieved

3.1. How well does licensing, registration or other controls implemented by supervisors or other authorities prevent criminals and their associates from holding, or being the beneficial owner of a significant or controlling interest or holding a management function in financial institutions or DNFBPs? How well are breaches of such licensing or registration requirements detected?

3.2. How well do the supervisors identify and maintain an understanding of the ML/TF risks in the financial and other sectors as a whole, between different sectors and types of institution, and of individual institutions?

References to “Supervisors” include SRBs for the purpose of the effectiveness assessment.
3.3. With a view to mitigating the risks, how well do supervisors, on a risk-sensitive basis, supervise or monitor the extent to which financial institutions and DNFBPs are complying with their AML/CFT requirements?

3.4. To what extent are remedial actions and/or effective, proportionate and dissuasive sanctions applied in practice?

3.5. To what extent are supervisors able to demonstrate that their actions have an effect on compliance by financial institutions and DNFBPs?

3.6. How well do the supervisors promote a clear understanding by financial institutions and DNFBPs of their AML/CFT obligations and ML/TF risks?

a) **Examples of Information that could support the conclusions on Core Issues**

1. Contextual factors regarding the size, composition, and structure of the financial and DNFBP sectors and informal or unregulated sector (e.g., number and types of financial institutions (including MVTS) and DNFBPs licensed or registered in each category; types of financial (including cross-border) activities; relative size, importance and materiality of sectors).

2. Supervisors’ risk models, manuals and guidance on AML/CFT (e.g., operations manuals for supervisory staff; publications outlining AML/CFT supervisory / monitoring approach; supervisory circulars, good and poor practises, thematic studies; annual reports).

3. Information on supervisory engagement with the industry, the FIU and other competent authorities on AML/CFT issues (e.g., providing guidance and training, organising meetings or promoting interactions with financial institutions and DNFBPs).

4. Information on supervision (e.g., frequency, scope and nature of monitoring and inspections (on-site and off-site); nature of breaches identified; sanctions and other remedial actions (e.g., corrective actions, reprimands, fines) applied, examples of cases where sanctions and other remedial actions have improved AML/CFT compliance).

b) **Examples of Specific Factors that could support the conclusions on Core Issues**

5. What are the measures implemented to prevent the establishment or continued operation of shell banks in the country?

6. To what extent are “fit and proper” tests or other similar measures used with regard to persons holding senior management functions, holding a significant or controlling interest, or professionally accredited in financial institutions and DNFBPs?

7. What measures do supervisors employ in order to assess the ML/TF risks of the sectors and entities they supervise/monitor? How often are the risk profiles reviewed, and what are the trigger events (e.g., changes in management or business activities)?

8. What measures and supervisory tools are employed to ensure that financial institutions (including financial groups) and DNFBPs are regulated and comply with their AML/CFT obligations (including those which relate to targeted financial sanctions on terrorism, and to
countermeasures called for by the FATF? To what extent has this promoted the use of the formal financial system?

9. To what extent do the frequency, intensity and scope of on-site and off-site inspections relate to the risk profile of the financial institutions (including financial group) and DNFBPs?

10. What is the level of co-operation between supervisors and other competent authorities in relation to AML/CFT (including financial group ML/TF risk management) issues? What are the circumstances where supervisors share or seek information from other competent authorities with regard to AML/CFT issues (including market entry)?

11. What measures are taken to identify, license or register, monitor and sanction as appropriate, persons who carry out MVTs?

12. Do supervisors have adequate resources to conduct supervision or monitoring for AML/CFT purposes, taking into account the size, complexity and risk profiles of the sector supervised or monitored?

13. What are the measures implemented to ensure that financial supervisors have operational independence so that they are not subject to undue influence on AML/CFT matters?
Immediate Outcome 4  Financial institutions and DNFBPs adequately apply AML/CFT preventive measures commensurate with their risks, and report suspicious transactions.

Characteristics of an effective system

Financial institutions and DNFBPs understand the nature and level of their money laundering and terrorist financing risks; develop and apply AML/CFT policies (including group-wide policies), internal controls, and programmes to adequately mitigate those risks; apply appropriate CDD measures to identify and verify their customers (including the beneficial owners) and conduct ongoing monitoring; adequately detect and report suspicious transactions; and comply with other AML/CFT requirements. This ultimately leads to a reduction in money laundering and terrorist financing activity within these entities.

This outcome relates primarily to Recommendations 9 to 23, and also elements of Recommendations 1, 6 and 29.

Note to Assessors:

Assessors are not expected to conduct an in-depth review of the operations of financial institutions or DNFBPs, but should consider, on the basis of evidence and interviews with supervisors, FIUs, financial institutions and DNFBPs, whether financial institutions and DNFBPs have adequately assessed and understood their exposure to money laundering and terrorist financing risks; whether their policies, procedures and internal controls adequately address these risks; and whether regulatory requirements (including STR reporting) are being properly implemented.

Core Issues to be considered in determining if the Outcome is being achieved

4.1. How well do financial institutions and DNFBPs understand their ML/TF risks and AML/CFT obligations?

4.2. How well do financial institutions and DNFBPs apply mitigating measures commensurate with their risks?

4.3. How well do financial institutions and DNFBPs apply the CDD and record-keeping measures (including beneficial ownership information and ongoing monitoring)? To what extent is business refused when CDD is incomplete?

4.4. How well do financial institutions and DNFBPs apply the enhanced or specific measures for: (a) PEPs, (b) correspondent banking, (c) new technologies, (d) wire transfers rules, (e) targeted financial sanctions relating to TF, and (f) higher-risk countries identified by the FATF?
4.5. To what extent do financial institutions and DNFBPs meet their reporting obligations on the suspected proceeds of crime and funds in support of terrorism? What are the practical measures to prevent tipping-off?

4.6. How well do financial institutions and DNFBPs apply internal controls and procedures (including at financial group level) to ensure compliance with AML/CFT requirements? To what extent are there legal or regulatory requirements (e.g., financial secrecy) impeding its implementation?

a) **Examples of Information that could support the conclusions on Core Issues**

1. Contextual factors regarding the size, composition, and structure of the financial and DNFBP sectors and informal or unregulated sector (e.g., number and types of financial institutions (including MVTS) and DNFBPs licensed or registered in each category; types of financial (including cross-border) activities; relative size, importance and materiality of sectors).

2. Information (including trends) relating to risks and general levels of compliance (e.g., internal AML/CFT policies, procedures and programmes, trends and typologies reports).

3. Examples of compliance failures (e.g., sanitised cases; typologies on the misuse of financial institutions and DNFBPs).

4. Information on compliance by financial institutions and DNFBPs (e.g., frequency of internal AML/CFT compliance review; nature of breaches identified and remedial actions taken or sanctions applied; frequency and quality of AML/CFT training; time taken to provide competent authorities with accurate and complete CDD information for AML/CFT purposes; accounts/relationships rejected due to incomplete CDD information; wire transfers rejected due to insufficient requisite information).

5. Information on STR reporting and other information as required by national legislation (e.g., number of STRs submitted, and the value of associated transactions; number and proportion of STRs from different sectors; the types, nature and trends in STR filings corresponding to ML/TF risks; average time taken to analyse the suspicious transaction before filing an STR).

b) **Examples of Specific Factors that could support the conclusions on Core Issues**

6. What are the measures in place to identify and deal with higher (and where relevant, lower) risk customers, business relationships, transactions, products and countries?

7. Does the manner in which AML/CFT measures are applied prevent the legitimate use of the formal financial system, and what measures are taken to promote financial inclusion?

8. To what extent do the CDD and enhanced or specific measures vary according to ML/TF risks across different sectors / types of institution, and individual institutions? What is the relative level of compliance between international financial groups and domestic institutions?

9. To what extent is there reliance on third parties for the CDD process and how well are the controls applied?
10. How well do financial institutions and groups, and DNFBPs ensure adequate access to information by the AML/CFT compliance function?

11. Do internal policies and controls of the financial institutions and groups, and DNFBPs enable timely review of: (i) complex or unusual transactions, (ii) potential STRs for reporting to the FIU, and (iii) potential false-positives? To what extent do the STRs reported contain complete, accurate and adequate information relating to the suspicious transaction?

12. What are the measures and tools employed to assess risk, formulate and review policy responses and institute appropriate risk mitigation and systems and controls for ML/TF risks?

13. How are AML/CFT policies and controls communicated to senior management and staff? What remedial actions and sanctions are taken by financial institutions and DNFBPs when AML/CFT obligations are breached?

14. How well are financial institutions and DNFBPs documenting their ML/TF risk assessments, and keeping them up to date?

15. Do financial institutions and DNFBPs have adequate resources to implement AML/CFT policies and controls relative to their size, complexity, business activities and risk profile?

16. How well is feedback provided to assist financial institutions and DNFBPs in detecting and reporting suspicious transactions?
Immediate Outcome 5

Legal persons and arrangements are prevented from misuse for money laundering or terrorist financing, and information on their beneficial ownership is available to competent authorities without impediments.

Characteristics of an effective system:

Measures are in place to:

- prevent legal persons and arrangements from being used for criminal purposes;
- make legal persons and arrangements sufficiently transparent; and
- ensure that accurate and up-to-date basic and beneficial ownership information is available on a timely basis.

Basic information is available publicly, and beneficial ownership information is available to competent authorities. Persons who breach these measures are subject to effective, proportionate and dissuasive sanctions. This results in legal persons and arrangements being unattractive for criminals to misuse for money laundering and terrorist financing.

This outcome relates primarily to Recommendations 24 and 25, and also elements of Recommendations 1, 10, 37 and 40.

Note to Assessors:

Assessors should also consider the relevant findings in relation to the level of international cooperation which competent authorities are participating in when assessing this Immediate Outcome. This would involve considering the extent to which competent authorities seek and are able to provide the appropriate assistance in relation to identifying and exchanging information (including beneficial ownership information) for legal persons and arrangements.

Core Issues to be considered in determining if the Outcome is being achieved

5.1. To what extent is the information on the creation and types of legal persons and arrangements in the country available publicly?

5.2. How well do the relevant competent authorities identify, assess and understand the vulnerabilities and the extent to which legal persons created in the country can be, or are being misused for ML/TF?

5.3. How well has the country implemented measures to prevent the misuse of legal persons and arrangements for ML/TF purposes?
5.4. To what extent can relevant competent authorities obtain adequate, accurate and current basic and beneficial ownership information on all types of legal persons created in the country, in a timely manner?

5.5. To what extent can relevant competent authorities obtain adequate, accurate and current beneficial ownership information on legal arrangements, in a timely manner?

5.6. To what extent are effective, proportionate and dissuasive sanctions applied against persons who do not comply with the information requirements?

a) **Examples of Information that could support conclusion on Core Issues**

1. Contextual information on the types, forms and basic features of legal persons and arrangements in the jurisdiction.

2. Experiences of law enforcement and other relevant competent authorities (e.g., *level of sanctions imposed for breach of the information requirements; where and how basic and beneficial ownership information (including information on the settler, trustee(s), protector and beneficiaries) is obtained; information used in supporting investigation)*.

3. Typologies and examples of the misuse of legal persons and arrangements (e.g., *frequency with which criminal investigations find evidence of the country's legal persons and arrangements being used for ML/TF; legal persons misused for illegal activities dismantled or struck-off)*.

4. Sources of basic and beneficial ownership information (e.g., *types of public information available to financial institutions and DNFBPs; types of information held in the company registry or by the company)*.

5. Information on the role played by “gatekeepers” (e.g., *company service providers, accountants, legal professionals*) in the formation and administration of legal persons and arrangements.

6. Other information (e.g., *information on existence of legal arrangements; responses (positive and negative) to requests for basic or beneficial ownership information received from other countries; information on the monitoring of quality of assistance)*.

b) **Examples of Specific Factors that could support the conclusions on Core Issues**

7. What are the measures taken to enhance the transparency of legal persons (including dealing with bearer shares and share warrants, and nominee shareholders and directors) and arrangements?

8. How do relevant authorities ensure that accurate and up-to-date basic and beneficial ownership information on legal persons is maintained? Is the presence and accuracy of information monitored, tested/certified or verified?

9. To what extent is the time taken for legal persons to register changes to the required basic and beneficial ownership information adequate to ensure that the information is accurate?
and up to date? Where applicable, to what extent are similar changes in legal arrangements registered in a timely manner?

10. To what extent can financial institutions and DNFBPs obtain accurate and up-to-date basic and beneficial ownership information on legal persons and arrangements? What is the extent of information that trustees disclose to financial institutions and DNFBPs?

11. Do the relevant authorities have adequate resources to implement the measures adequately?
Immediate Outcome 6
Financial intelligence and all other relevant information are appropriately used by competent authorities for money laundering and terrorist financing investigations.

Characteristics of an effective system

A wide variety of financial intelligence and other relevant information is collected and used by competent authorities to investigate money laundering, associated predicate offences and terrorist financing. This delivers reliable, accurate, and up-to-date information; and the competent authorities have the resources and skills to use the information to conduct their analysis and financial investigations, to identify and trace the assets, and to develop operational analysis.

This outcome relates primarily to Recommendations 29 to 32 and also elements of Recommendations 1, 2, 4, 8, 9, 34 and 40.

Note to Assessors:

1) This outcome includes the work that the FIU does to analyse STRs and other data; and the use by competent authorities of FIU products, other types of financial intelligence and other relevant information.

2) Assessors should also consider the relevant findings on the level of international co-operation which competent authorities are participating in when assessing this Immediate Outcome. This would involve considering the extent which FIUs and law enforcement agencies are able to, and do seek appropriate financial and law enforcement intelligence and other information from their foreign counterparts.

Core Issues to be considered in determining if the Outcome is being achieved

6.1. To what extent are financial intelligence and other relevant information accessed and used in investigations to develop evidence and trace criminal proceeds related to ML, associated predicate offences and TF?

---

70 The sources include information derived from STRs, cross-border reports on currency and bearer negotiable movements, law enforcement intelligence; criminal records; supervisory and regulatory information; and information with company registries etc. Where applicable, it would also include reports on cash transactions, foreign currency transactions, wire transfers records, information from other government agencies including security agencies; tax authorities, asset registries, benefits agencies, NPOs authorities; and information which can be obtained through compulsory measures from financial institutions and DNFBPs including CDD information and transaction records, as well as information from open sources.
6.2. To what extent are the competent authorities receiving or requesting reports (e.g., STRs, reports on currency and bearer negotiable instruments) that contain relevant and accurate information that assists them to perform their duties?

6.3. To what extent is FIU analysis and dissemination supporting the operational needs of competent authorities?

6.4. To what extent do the FIU and other competent authorities co-operate and exchange information and financial intelligence? How securely do the FIU and competent authorities protect the confidentiality of the information they exchange or use?

**a) Examples of Information that could support the conclusions on Core Issues**

1. Experiences of law enforcement and other competent authorities (e.g., types of financial intelligence and other information available; frequency with which they are used as investigative tools).

2. Examples of the co-operation between FIUs and other competent authorities and use of financial intelligence (e.g., statistics of financial intelligence disseminated/exchanged; cases where financial intelligence was used in investigation and prosecution of ML/TF and associated predicate offences, or in identifying and tracing assets).

3. Information on STRs (e.g., number of STRs/cases analysed; perception of quality of information disclosed in STRs; frequency with which competent authorities come across examples of unreported suspicious transactions; cases of tipping-off; see also Immediate Outcome 4 for information on STR reporting).

4. Information on other financial intelligence and information (e.g., number of currency and bearer negotiable instruments reports receive, and analysed; types of information that law enforcement and other competent authorities receive or obtain/access from other authorities, financial institutions and DNFBPs).

5. Other documents (e.g., guidance on the use and reporting of STRs and other financial intelligence; typologies produced using financial intelligence).

**b) Examples of Specific Factors that could support the conclusions on Core Issues**

6. How well does the FIU access and use additional information to analyse and add value to STRs? How does the FIU ensure the rigour of its analytical assessments?

7. How well do competent authorities make use of the information contained in STRs and other financial intelligence to develop operational analysis?

8. To what extent does the FIU incorporate feedback from competent authorities, typologies and operational experience into its functions?

9. What are the mechanisms implemented to ensure full and timely co-operation between competent authorities, and from financial institutions, DNFBPs and other reporting entities...
to provide the relevant information? Are there any impediments to the access of information?

10. To what extent do the STRs reported contain complete, accurate and adequate information relating to the suspicious transaction?

11. To what extent do the relevant competent authorities review and engage (including outreach by the FIU) reporting entities to enhance financial intelligence reporting?

12. Do the relevant authorities have adequate resources (including IT tools for data mining and analysis of financial intelligence and to protect its confidentiality) to perform its functions?

13. What are the measures implemented to ensure that the FIU has operational independence so that it is not subject to undue influence on AML/CFT matters?
Immediate Outcome 7

Money laundering offences and activities are investigated and offenders are prosecuted and subject to effective, proportionate and dissuasive sanctions.

**Characteristics of an effective system**

Money laundering activities, and in particular major proceeds-generating offences, are investigated; offenders are successfully prosecuted; and the courts apply effective, proportionate and dissuasive sanctions to those convicted. This includes pursuing parallel financial investigations and cases where the associated predicate offences occur outside the country, and investigating and prosecuting stand-alone money laundering offences. The component parts of the systems (investigation, prosecution, conviction, and sanctions) are functioning coherently to mitigate the money laundering risks. Ultimately, the prospect of detection, conviction, and punishment dissuades potential criminals from carrying out proceeds generating crimes and money laundering.

This outcome relates primarily to Recommendations 3, 30 and 31, and also elements of Recommendations 1, 2, 32, 37, 39 and 40.

**Note to Assessors:**

Assessors should also consider the relevant findings on the level of international co-operation which competent authorities are participating in when assessing this Immediate Outcome. This would involve considering the extent to which law enforcement agencies are seeking appropriate assistance from their foreign counterparts in cross-border money laundering cases.

**Core Issues to be considered in determining if the Outcome is being achieved**

7.1. How well, and in what circumstances are potential cases of ML identified and investigated (including through parallel financial investigations)?

7.2. To what extent are the types of ML activity being investigated and prosecuted consistent with the country’s threats and risk profile and national AML/CFT policies?

7.3. To what extent are different types of ML cases prosecuted (e.g., foreign predicate offence, third-party laundering, stand-alone offence etc.) and offenders convicted?

7.4. To what extent are the sanctions applied against natural or legal persons convicted of ML offences effective, proportionate and dissuasive?

7.5. To what extent do countries apply other criminal justice measures in cases where a ML investigation has been pursued but where it is not possible, for justifiable reasons, to secure a ML conviction? Such alternative measures should not diminish the importance of, or be a substitute for, prosecutions and convictions for ML offences.
a) **Examples of Information that could support the conclusions on Core Issues**

1. Experiences and examples of investigations, prosecutions and convictions (e.g., examples of cases rejected due to insufficient investigative evidence; what are the significant or complex ML cases that the country has investigated and prosecuted; examples of successful cases against domestic and transnational organised crime; cases where other criminal sanctions or measures are pursued instead of ML convictions).

2. Information on ML investigations, prosecutions and convictions (e.g., number of investigations and prosecutions for ML activity; proportion of cases leading to prosecution or brought to court; number or proportion of ML convictions relating to third party laundering, stand-alone offence, self-laundering, and foreign predicate offences; types of predicate crimes involved; level of sanctions imposed for ML offences; sanctions imposed for ML compared with those for other predicate offences).

b) **Examples of Specific Factors that could support the conclusions on Core Issues**

3. What are the measures taken to identify, initiate and prioritise ML cases (at least in relation to all major proceeds-generating offences) for investigation (e.g., focus between small and larger or complex cases, between domestic and foreign predicates etc.)?

4. To what extent, and how quickly, can competent authorities obtain or access relevant financial intelligence and other information required for ML investigations?

5. To what extent are joint or cooperative investigations (including the use of multi-disciplinary investigative units) and other investigative techniques (e.g., postponing or waiving the arrest or seizure of money for the purpose of identifying persons involved) used in major proceeds generating offences?

6. How are ML cases prepared for timely prosecution and trial?

7. In what circumstances are decisions made not to proceed with prosecutions where there is indicative evidence of a ML offence?

8. To what extent are ML prosecutions: (i) linked to the prosecution of the predicate offence (including foreign predicate offences), or (ii) prosecuted as an autonomous offence?

9. How do the relevant authorities, taking into account the legal systems, interact with each other throughout the life-cycle of a ML case, from the initiation of an investigation, through gathering of evidence, referral to prosecutors and the decision to go to trial?

10. Are there other aspects of the investigative, prosecutorial or judicial process that impede or hinder ML prosecutions and sanctions?

11. Do the competent authorities have adequate resources (including financial investigation tools) to manage their work or address the ML risks adequately?

12. Are dedicated staff/units in place to investigate ML? Where resources are shared, how are ML investigations prioritised?
Immediate Outcome 8
Proceeds and instrumentalities of crime are confiscated.

Characteristics of an effective system

Criminals are deprived (through timely use of provisional and confiscation measures) of the proceeds and instrumentalities of their crimes (both domestic and foreign) or of property of an equivalent value. Confiscation includes proceeds recovered through criminal, civil or administrative processes; confiscation arising from false cross-border disclosures or declarations; and restitution to victims (through court proceedings). The country manages seized or confiscated assets, and repatriates or shares confiscated assets with other countries. Ultimately, this makes crime unprofitable and reduces both predicate crimes and money laundering.

This outcome relates primarily to Recommendations 1, 4, 32 and also elements of Recommendations 30, 31, 37, 38, and 40.

Note to Assessors:

Assessors should also consider the relevant findings on the level of international co-operation which competent authorities are participating in when assessing this Immediate Outcome. This would involve considering the extent which law enforcement and prosecutorial agencies are seeking appropriate assistance from their foreign counterparts in relation to cross-border proceeds and instrumentalities of crime.

Core Issues to be considered in determining if the Outcome is being achieved

8.1. To what extent is confiscation of criminal proceeds, instrumentalities and property of equivalent value pursued as a policy objective?

8.2. How well are the competent authorities confiscating (including repatriation, sharing and restitution) the proceeds and instrumentalities of crime, and property of an equivalent value, involving domestic and foreign predicate offences and proceeds which have been moved to other countries?

8.3. To what extent is confiscation regarding falsely / not declared or disclosed cross-border movements of currency and bearer negotiable instruments being addressed and applied as an effective, proportionate and dissuasive sanction by border/custom or other relevant authorities?

8.4. How well do the confiscation results reflect the assessments(s) of ML/TF risks and national AML/CFT policies and priorities?
METHODOLOGY

ASSESSING TECHNICAL COMPLIANCE WITH THE FATF RECOMMENDATIONS AND THE EFFECTIVENESS OF AML/CFT SYSTEMS

a) **Examples of Information that could support the conclusions on Core Issues**

1. Experiences and examples of confiscation proceedings (e.g., *the most significant cases in the past; types of confiscation orders obtained by the country; trends indicating changes in methods by which proceeds of crime is being laundered*).

2. Information on confiscation (e.g., *number of criminal cases where confiscation is pursued; type of cases which involve confiscation; value of proceeds of crimes, instrumentalities or property of equivalent value confiscated, broken down by foreign or domestic offences, whether through criminal or civil procedures (including non-conviction-based confiscation); value of falsely / not declared or disclosed cross-border currency and bearer negotiable instruments confiscated; value or proportion of seized or frozen proceeds that is subject to confiscation; value or proportion of confiscation orders realised*).

3. Other relevant information (e.g. *value of criminal assets seized / frozen; amount of proceeds of crime restituted to victims, shared or repatriated*).

b) **Examples of Specific Factors that could support the conclusions on Core Issues**

4. What are the measures and approach adopted by competent authorities to target proceeds and instrumentalities of crime (including major proceeds-generating crimes and those that do not originate domestically or have flowed overseas)?

5. How do authorities decide, at the outset of a criminal investigation, to commence a financial investigation, with a view to confiscation?

6. How well are competent authorities identifying and tracing proceeds and instrumentalities of crimes or assets of equivalent value? How well are provisional measures (e.g., freeze or seizures) used to prevent the flight or dissipation of assets?

7. What is the approach adopted by the country to detect and confiscate cross-border currency and bearer negotiable instruments that are suspected to relate to ML/TF and associated predicate offences or that are falsely / not declared or disclosed?

8. What are the measures adopted to preserve and manage the value of seized/confiscated assets?

9. Are there other aspects of the investigative, prosecutorial or judicial process that promote or hinder the identification, tracing and confiscation of proceeds and instrumentalities of crime or assets of equivalent value?

10. Do the relevant competent authorities have adequate resources to perform their functions adequately?
Immediate Outcome 9

Terrorist financing offences and activities are investigated and persons who finance terrorism are prosecuted and subject to effective, proportionate and dissuasive sanctions.

Characteristics of an effective system

Terrorist financing activities are investigated; offenders are successfully prosecuted; and courts apply effective, proportionate and dissuasive sanctions to those convicted. When appropriate, terrorist financing is pursued as a distinct criminal activity and financial investigations are conducted to support counter-terrorism investigations, with good co-ordination between relevant authorities. The components of the system (investigation, prosecution, conviction and sanctions) are functioning coherently to mitigate the terrorist financing risks. Ultimately, the prospect of detection, conviction and punishment deters terrorist financing activities.

This outcome relates primarily to Recommendations 5, 30, 31 and 39, and also elements of Recommendations 1, 2, 32, 37 and 40.

Note to Assessors:

1) Assessors should be aware that some elements of this outcome may involve material of a sensitive nature (e.g., information that is gathered for national security purposes) which countries may be reluctant or not able to make available to assessors.

2) Assessors should also consider the relevant findings on the level of international co-operation which competent authorities are participating in when assessing this Immediate Outcome. This would involve considering the extent which law enforcement and prosecutorial agencies are seeking appropriate assistance from their foreign counterparts in cross-border terrorist financing cases.

Core Issues to be considered in determining if the Outcome is being achieved

9.1. To what extent are the different types of TF activity (e.g., collection, movement and use of funds) prosecuted and offenders convicted? Is this consistent with the country’s TF risk profile?

9.2. How well are cases of TF identified, and investigated? To what extent do the investigations identify the specific role played by the terrorist financier?

9.3. To what extent is the investigation of TF integrated with, and used to support, national counter-terrorism strategies and investigations (e.g., identification and designation of terrorists, terrorist organisations and terrorist support networks)?

9.4. To what extent are the sanctions or measures applied against natural and legal persons convicted of TF offences effective, proportionate and dissuasive?
METHODOLOGY

ASSESSING TECHNICAL COMPLIANCE WITH THE FATF RECOMMENDATIONS AND THE EFFECTIVENESS OF AML/CFT SYSTEMS

9.5. To what extent is the objective of the outcome achieved by employing other criminal justice, regulatory or other measures to disrupt TF activities where it is not practicable to secure a TF conviction?

a) Examples of Information that could support the conclusions on Core Issues

1. Experiences and examples of TF investigations and prosecutions (e.g., cases where TF investigations are used to support counter-terrorism investigations and prosecutions; significant cases where (foreign or domestic) terrorists and terrorist groups are targeted, prosecuted or disrupted; observed trends in TF levels and techniques; cases where other criminal sanctions or measures are pursued instead of TF convictions).

2. Information on TF investigations, prosecutions and convictions (e.g., number of TF investigations and prosecutions; proportion of cases leading to TF prosecution, type of TF prosecutions and convictions (e.g., distinct offences, foreign or domestic terrorists); level of sanctions imposed for TF offences; sanctions imposed for TF compared with those for other criminal activity; types and level of disruptive measures applied).

b) Examples of Specific Factors that could support the conclusions on Core Issues

3. What are the measures taken to identify, initiate and prioritise TF cases to ensure prompt investigation and action against major threats and to maximise disruption?

4. To what extent and how quickly can competent authorities obtain and access relevant financial intelligence and other information required for TF investigations and prosecutions?

5. What are the underlying considerations for decisions made not to proceed with prosecutions for a TF offence?

6. To what extent do the authorities apply specific action plans or strategies to deal with particular TF threats and trends? Is this consistent with the national AML/CFT policies, strategies and risks?

7. How well do law enforcement authorities, the FIU, counter-terrorism units and other security and intelligence agencies co-operate and co-ordinate their respective tasks associated with this outcome?

8. Are there other aspects of the investigative, prosecutorial or judicial process that impede or hinder TF prosecutions, sanctions or disruption?

9. Do the competent authorities have adequate resources (including financial investigation tools) to manage their work or address the TF risks adequately?

10. Are dedicated staff/units in place to investigate TF? Where resources are shared, how are TF investigations prioritised?
Immediate Outcome 10

Terrorists, terrorist organisations and terrorist financiers are prevented from raising, moving and using funds, and from abusing the NPO sector.

Characteristics of an effective system

Terrorists, terrorist organisations and terrorist support networks are identified and deprived of the resources and means to finance or support terrorist activities and organisations. This includes proper implementation of targeted financial sanctions against persons and entities designated by the United Nations Security Council and under applicable national or regional sanctions regimes. The country also has a good understanding of the terrorist financing risks and takes appropriate and proportionate actions to mitigate those risks, including measures that prevent the raising and moving of funds through entities or methods which are at greatest risk of being misused by terrorists. Ultimately, this reduces terrorist financing flows, which would prevent terrorist acts.

This outcome relates primarily to Recommendations 1, 4, 6 and 8, and also elements of Recommendations 14, 16, 30 to 32, 37, 38 and 40.

Note to Assessors:

Assessors should also consider the relevant findings on the level of international co-operation which competent authorities are participating in when assessing this Immediate Outcome.

Core Issues to be considered in determining if the Outcome is being achieved

10.1. How well is the country implementing targeted financial sanctions pursuant to (i) UNSCR1267 and its successor resolutions, and (ii) UNSCR1373 (at the supra-national or national level, whether on the country’s own motion or after examination, to give effect to the request of another country)?

10.2. To what extent, without disrupting legitimate NPO activities, has the country implemented a targeted approach, conducted outreach, and exercised oversight in dealing with NPOs that are at risk from the threat of terrorist abuse?

10.3. To what extent are terrorists, terrorist organisations and terrorist financiers deprived (whether through criminal, civil or administrative processes) of assets and instrumentalities related to TF activities?

10.4. To what extent are the above measures consistent with the overall TF risk profile?

a) Examples of Information that could support the conclusions on Core Issues

1. Experiences of law enforcement, FIU and counter terrorism authorities (e.g., trends indicating that terrorist financiers are researching alternative methods for raising /
transmitting funds; intelligence/source reporting indicating that terrorist organisations are having difficulty raising funds in the country).

2. Examples of interventions and confiscation (e.g., significant cases where terrorists, terrorist organisations or terrorist financiers are prevented from raising, moving and using funds or their assets seized / confiscated; investigations and interventions in NPOs misused by terrorists).

3. Information on targeted financial sanctions (e.g., persons and accounts subject to targeted financial sanctions under UNSC or other designations; designations made (relating to UNSCR1373); assets frozen; transactions rejected; time taken to designate individuals; time taken to implement asset freeze following designation).

4. Information on NPO supervision and monitoring (e.g. frequency of review and monitoring of the NPO sector (including risk assessments); frequency of engagement and outreach (including guidance) to NPO sector regarding CFT measures and trends; remedial measures and sanctions taken against NPOs).

b) **Examples of Specific Factors that could support the conclusions on Core Issues**

5. What measures has the country adopted to ensure the proper implementation of targeted financial sanctions without delay? How are those designations and obligations communicated to financial institutions, DNFBPs and the general public in a timely manner?

6. How well are the procedures and mechanisms implemented for (i) identifying targets for designation / listing, (ii) freezing / unfreezing, (iii) de-listing, and (iv) granting exemption? How well is the relevant information collected?

7. To what extent is the country utilising the tools provided by UNSCRs 1267 and 1373 to freeze and prevent the financial flows of terrorists?

8. How well do the systems for approving or licensing the use of assets by designated entities for authorised purposes comply with the requirements set out in the relevant UNSCRs (e.g., UNSCR 1452 and any successor resolutions)?

9. What is the approach adopted by competent authorities to target terrorist assets? To what extent are assets tracing, financial investigations and provisional measures (e.g., freezing and seizing) used to complement the approach?

10. What is the level of licensing or registration for NPOs? To what extent is a risk-sensitive approach taken to supervise or monitor NPOs at risk from terrorist abuse and appropriate preventive, investigative, criminal, civil or administrative actions and co-operation mechanisms adopted?

11. How well do NPOs understand their vulnerabilities and comply with the measures to protect themselves from the threat of terrorist abuse?
12. Are there other aspects of the investigative, prosecutorial or judicial process that promote or hinder the identification, tracing and deprivation of assets and instrumentalities related to terrorists, terrorist organisations or terrorist financiers?

13. Do the relevant competent authorities have adequate resources to manage their work or address the TF risks adequately?

14. Where resources are shared, how are TF related activities prioritised?
Immediate Outcome 11

Persons and entities involved in the proliferation of weapons of mass destruction are prevented from raising, moving and using funds, consistent with the relevant UNSCRs.

Characteristics of an effective system

Persons and entities designated by the United Nations Security Council Resolutions (UNSCRs) on proliferation of weapons of mass destruction (WMD) are identified, deprived of resources, and prevented from raising, moving, and using funds or other assets for the financing of proliferation. Targeted financial sanctions are fully and properly implemented without delay; monitored for compliance and there is adequate co-operation and co-ordination between the relevant authorities to prevent sanctions from being evaded, and to develop and implement policies and activities to combat the financing of proliferation of WMD.

This outcome relates to Recommendation 7 and elements of Recommendation 2.

Core Issues to be considered in determining if the Outcome is being achieved

11.1. How well is the country implementing, without delay, targeted financial sanctions concerning the UNSCRs relating to the combating of financing of proliferation?

11.2. To what extent are the funds or other assets of designated persons and entities (and those acting on their behalf or at their direction) identified and such persons and entities prevented from operating or executing financial transactions related to proliferation?

11.3. To what extent do financial institutions and DNFBPs comply with, and understand their obligations regarding targeted financial sanctions relating to financing of proliferation?

11.4. How well are relevant competent authorities monitoring and ensuring compliance by financial institutions and DNFBPs with their obligations regarding targeted financial sanctions relating to financing of proliferation?

a) Examples of Information that could support the conclusions on Core Issues

1. Examples of investigations and intervention relating to financing of proliferation (e.g., investigations into breaches of sanctions; significant cases in which country has taken enforcement actions (e.g., freezing or seizures) or provided assistance).

2. Information on targeted financial sanctions relating to financing of proliferation (e.g., accounts of individuals and entities subject to targeted financial sanctions; value of frozen assets and property; time taken to designate persons and entities; time taken to freeze assets and property of individuals and entities following their designation by the UNSC).
3. Monitoring and other relevant information relating to financing of proliferation (e.g., frequency of review and monitoring of financial institutions and DNFBPs for compliance with targeted financial sanctions; frequency of engagement and outreach; guidance documents; level of sanctions applied on financial institutions and DNFBPs for breaches).

b) Examples of Specific Factors that could support the conclusions on Core Issues

4. What measures has the country adopted to ensure the proper implementation of targeted financial sanctions relating to financing of proliferation without delay? How are these designations and obligations communicated to relevant sectors in a timely manner?

5. Where relevant, how well are the procedures implemented for (i) designation / listing, (ii) freezing / unfreezing, (iii) de-listing, and (iv) granting exemption? To what extent do they comply with the UNSCR requirements?

6. How well do the systems and mechanisms for managing frozen assets and licensing the use of assets by designated individuals and entities for authorised purposes, safeguard human rights and prevent the misuse of funds?

7. What mechanisms are used to prevent the evasion of sanctions? Do relevant competent authorities provide financial institutions and DNFBPs with other guidance or specific feedback?

8. To what extent would the relevant competent authorities be able to obtain accurate basic and beneficial ownership information on legal persons (e.g., front companies), when investigating offences or breaches concerning the UNSCRs relating financing of proliferation?

9. To what extent are the relevant competent authorities exchanging intelligence and other information for investigations of violations and breaches of targeted financial sanctions in relation to financing of proliferation, as per the relevant UNSCRs?

10. Do the relevant competent authorities have adequate resources to manage their work or address the financing of proliferation risks adequately?

FATF GUIDANCE DOCUMENTS

International Best Practices: Combating the Abuse of Non-Profit Organisations (October 2002).

Guidance on the Risk-Based Approach (June 2007 - October 2009) for:

- the Financial Sector;
- Real Estate Agents;
- Accountants;
- TCSPs;
- Dealers in precious metals and stones;
- Casinos;
- Legal Professionals;
- Money Service Businesses; and
- the Life Insurance Sector.

Capacity Building for Mutual Evaluations and Implementation of the FATF Standards within Low Capacity Countries (February 2008).

Best Practices Paper on Trade Based Money Laundering (June 2008).

International Best Practices: Detecting and Preventing the Illicit Cross-Border Transportation of Cash and Bearer Negotiable Instruments (February 2010).
Best Practices Paper on Recommendation 2: Sharing among domestic competent authorities information related to the financing of proliferation (March 2012)

Financial Investigations Guidance (July 2012)

Best Practices: Managing the anti-money laundering and counter-terrorist financing policy implications of voluntary tax compliance programmes (October 2012)

Best Practices on Confiscation (Recommendations 4 and 38) and a Framework for Ongoing Work on Asset Recovery (October 2012)

FATF Guidance on Anti-Money Laundering and Terrorist Financing Measures and Financial Inclusion (February 2013)

Guidance on National Money Laundering / Terrorist Financing Risk Assessment (February 2013)
LEGAL BASIS OF REQUIREMENTS ON FINANCIAL INSTITUTIONS AND DNFBPS

1. All requirements for financial institutions or DNFBPs should be introduced either (a) in law (see the specific requirements in Recommendations 10, 11 and 20 in this regard), or (b) for all other cases, in law or enforceable means (the country has discretion).

2. In Recommendations 10, 11 and 20, the term “law” refers to any legislation issued or approved through a Parliamentary process or other equivalent means provided for under the country’s constitutional framework, which imposes mandatory requirements with sanctions for non-compliance. The sanctions for non-compliance should be effective, proportionate and dissuasive (see Recommendation 35). The notion of law also encompasses judicial decisions that impose relevant requirements, and which are binding and authoritative in all parts of the country.

3. The term “Enforceable means” refers to regulations, guidelines, instructions or other documents or mechanisms that set out enforceable AML/CFT requirements in mandatory language with sanctions for non-compliance, and which are issued or approved by a competent authority. The sanctions for non-compliance should be effective, proportionate and dissuasive (see Recommendation 35).

4. In considering whether a document or mechanism has requirements that amount to enforceable means, the following factors should be taken into account:

   (a) There must be a document or mechanism that sets out or underpins requirements addressing the issues in the FATF Recommendations, and providing clearly stated requirements which are understood as such. For example:

      (i) if particular measures use the word shall or must, this should be considered mandatory;

      (ii) if they use should, this could be mandatory if both the regulator and the regulated institutions demonstrate that the actions are directly or indirectly required and are being implemented; language such as measures are encouraged, are recommended or institutions should consider is less likely to be regarded as mandatory. In any case where weaker language is used, there is a presumption that the language is not mandatory (unless the country can demonstrate otherwise).

   (b) The document/mechanism must be issued or approved by a competent authority.

   (c) There must be sanctions for non-compliance (sanctions need not be in the same document that imposes or underpins the requirement, and can be in another document, provided that there are clear links between the requirement and the
available sanctions), which should be effective, proportionate and dissuasive. This involves consideration of the following issues:

(i) there should be an adequate range of effective, proportionate and dissuasive sanctions available if persons fail to comply with their obligations;

(ii) the sanctions should be directly or indirectly applicable for a failure to comply with an AML/CFT requirement. If non-compliance with an AML/CFT requirement does not have a sanction directly attached to it, then the use of sanctions for violation of broader requirements, such as not having proper systems and controls or not operating in a safe and sound manner, is satisfactory provided that, at a minimum, a failure to meet one or more AML/CFT requirements could be (and has been as appropriate) adequately sanctioned without a need to prove additional prudential failures unrelated to AML/CFT; and

(iii) whether there is satisfactory evidence that effective, proportionate and dissuasive sanctions have been applied in practice.

5. In all cases it should be apparent that financial institutions and DNFBPs understand that sanctions would be applied for non-compliance and what those sanctions could be.
## GLOSSARY

<table>
<thead>
<tr>
<th>Terms</th>
<th>Definitions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accounts</td>
<td>References to “accounts” should be read as including other similar business relationships between financial institutions and their customers.</td>
</tr>
<tr>
<td>Accurate</td>
<td>Is used to describe information that has been verified for accuracy.</td>
</tr>
<tr>
<td>Agent</td>
<td>For the purposes of Recommendations 14 and 16, agent means any natural or legal person providing MVTS on behalf of an MVTS provider, whether by contract with or under the direction of the MVTS provider.</td>
</tr>
<tr>
<td>Appropriate authorities</td>
<td>Refers to competent authorities, including accrediting institutions, and self-regulatory organisations.</td>
</tr>
<tr>
<td>Associate NPOs</td>
<td>Includes foreign branches of international NPOs.</td>
</tr>
<tr>
<td>Batch transfer</td>
<td>Is a transfer comprised of a number of individual wire transfers that are being sent to the same financial institutions, but may/may not be ultimately intended for different persons.</td>
</tr>
<tr>
<td>Bearer negotiable instruments</td>
<td><em>Bearer negotiable instruments (BNIs)</em> includes monetary instruments in bearer form such as: traveller’s cheques; negotiable instruments (including cheques, promissory notes and money orders) that are either in bearer form, endorsed without restriction, made out to a fictitious payee, or otherwise in such form that title thereto passes upon delivery; incomplete instruments (including cheques, promissory notes and money orders) signed, but with the payee’s name omitted.</td>
</tr>
<tr>
<td>Bearer shares</td>
<td><em>Bearer shares</em> refers to negotiable instruments that accord ownership in a legal person to the person who possesses the bearer share certificate.</td>
</tr>
<tr>
<td>Beneficial owner</td>
<td><em>Beneficial owner</em> refers to the natural person(s) who ultimately owns or controls a customer and/or the natural person on whose behalf a transaction is being conducted. It also includes those persons who exercise ultimate effective control over a legal person or arrangement.</td>
</tr>
<tr>
<td>Beneficiary</td>
<td>The meaning of the term <em>beneficiary</em> in the FATF Recommendations depends on the context:</td>
</tr>
</tbody>
</table>

---

71 Reference to “ultimately owns or controls” and “ultimate effective control” refer to situations in which ownership/control is exercised through a chain of ownership or by means of control other than direct control.

72 This definition should also apply to beneficial owner of a beneficiary under a life or other investment linked insurance policy.
In trust law, a beneficiary is the person or persons who are entitled to the benefit of any trust arrangement. A beneficiary can be a natural or legal person or arrangement. All trusts (other than charitable or statutory permitted non-charitable trusts) are required to have ascertainable beneficiaries. While trusts must always have some ultimately ascertainable beneficiary, trusts may have no defined existing beneficiaries but only objects of a power until some person becomes entitled as beneficiary to income or capital on the expiry of a defined period, known as the accumulation period. This period is normally co-extensive with the trust perpetuity period which is usually referred to in the trust deed as the trust period.

In the context of life insurance or another investment linked insurance policy, a beneficiary is the natural or legal person, or a legal arrangement, or category of persons, who will be paid the policy proceeds when/if an insured event occurs, which is covered by the policy.

It also refers to those natural persons, or groups of natural persons who receive charitable, humanitarian or other types of assistance through the services of the NPO.

Refers as well to the natural or legal person or legal arrangement who is identified by the originator as the receiver of the requested wire transfer.

<tbody>
<tr>
<td>Beneficiary Financial Institution</td>
<td>Refers to the financial institution which receives the wire transfer from the ordering financial institution directly or through an intermediary financial institution and makes the funds available to the beneficiary.</td>
</tr>
<tr>
<td>Competent authorities</td>
<td>Competent authorities refers to all public authorities with designated responsibilities for combating money laundering and/or terrorist financing. In particular, this includes the FIU; the authorities that have the function of investigating and/or prosecuting money laundering, associated predicate offences and terrorist financing, and seizing/freezing and confiscating criminal assets; authorities receiving reports on cross-border transportation of currency &amp; BNIs; and authorities that have AML/CFT supervisory or monitoring responsibilities aimed at ensuring compliance by financial institutions and DNFBPs with AML/CFT requirements. SRBs are not to be regarded as a competent authorities.</td>
</tr>
<tr>
<td>Confiscation</td>
<td>The term confiscation, which includes forfeiture where applicable, means the permanent deprivation of funds or other assets by order of a competent authority or a court. Confiscation or forfeiture takes place through a judicial or</td>
</tr>
</tbody>
</table>

73 This includes financial supervisors established as independent non-governmental authorities with statutory powers.
administerative procedure that transfers the ownership of specified funds or other assets to be transferred to the State⁷⁴. In this case, the person(s) or entity(ies) that held an interest in the specified funds or other assets at the time of the confiscation or forfeiture loses all rights, in principle, to the confiscated or forfeited funds or other assets. Confiscation or forfeiture orders are usually linked to a criminal conviction or a court decision whereby the confiscated or forfeited property is determined to have been derived from or intended for use in a violation of the law.

Core Principles

Core Principles refers to the Core Principles for Effective Banking Supervision issued by the Basel Committee on Banking Supervision, the Objectives and Principles for Securities Regulation issued by the International Organization of Securities Commissions, and the Insurance Supervisory Principles issued by the International Association of Insurance Supervisors.

Correspondent banking

Correspondent banking is the provision of banking services by one bank (the “correspondent bank”) to another bank (the “respondent bank”). Large international banks typically act as correspondents for thousands of other banks around the world. Respondent banks may be provided with a wide range of services, including cash management (e.g., interest-bearing accounts in a variety of currencies), international wire transfers, cheque clearing, payable-through accounts and foreign exchange services.

Country

All references in the FATF Recommendations to country or countries apply equally to territories or jurisdictions.

Cover Payment

Refers to a wire transfer that combines a payment message sent directly by the ordering financial institution to the beneficiary financial institution with the routing of the funding instruction (the cover) from the ordering financial institution to the beneficiary financial institution through one or more intermediary financial institutions.

Criminal activity

Criminal activity refers to: (a) all criminal acts that would constitute a predicate offence for money laundering in the country; or (b) at a minimum to those offences that would constitute a predicate offence as required by Recommendation 3.

Cross-border Wire Transfer

Refers to any wire transfer where the ordering financial institution and beneficiary financial institution are located in different countries. This term also refers to any chain of wire transfer in which at least one of the financial institutions involved is located in a different country.

Currency

Currency refers to banknotes and coins that are in circulation as a medium of exchange.

⁷⁴ For the purposes of the effectiveness assessment, “confiscation” may have a wider application.

</table>
| Designated categories of offences | *Designated categories of offences* means:  
- participation in an organised criminal group and racketeering;  
- terrorism, including terrorist financing;  
- trafficking in human beings and migrant smuggling;  
- sexual exploitation, including sexual exploitation of children;  
- illicit trafficking in narcotic drugs and psychotropic substances;  
- illicit arms trafficking;  
- illicit trafficking in stolen and other goods;  
- corruption and bribery;  
- fraud;  
- counterfeiting currency;  
- counterfeiting and piracy of products;  
- environmental crime;  
- murder, grievous bodily injury;  
- kidnapping, illegal restraint and hostage-taking;  
- robbery or theft;  
- smuggling; (including in relation to customs and excise duties and taxes);  
- tax crimes (related to direct taxes and indirect taxes);  
- extortion;  
- forgery;  
- piracy; and  
- insider trading and market manipulation. |

When deciding on the range of offences to be covered as predicate offences under each of the categories listed above, each country may decide, in accordance with its domestic law, how it will define those offences and the nature of any particular elements of those offences that make them serious offences.

| Designated non-financial businesses and professions | *Designated non-financial businesses and professions* means:  
- a) Casinos\(^75\)  
- b) Real estate agents. |

---

\(^75\) References to *Casinos* throughout the FATF Standards include internet- and ship-based casinos.

<tr>
<td>Financial group</td>
<td><em>Financial group</em> means a group that consists of a parent company or of any other type of legal person exercising control and coordinating functions over the rest of the group for the application of group supervision under the Core Principles, together with branches and/or subsidiaries that are subject to AML/CFT policies and procedures at the group level.</td>
</tr>
</tbody>
</table>
| Financial institutions | *Financial institutions* means any natural or legal person who conducts as a business one or more of the following activities or operations for or on behalf of a customer:  
  1. Acceptance of deposits and other repayable funds from the public. **78**  
  2. Lending. **79**  
  3. Financial leasing. **80**  
  4. Money or value transfer services. **81** |

---

**78** This also captures private banking.  
**79** This includes *inter alia*: consumer credit; mortgage credit; factoring, with or without recourse; and finance of commercial transactions (including forfeiting).  
**80** This does not extend to financial leasing arrangements in relation to consumer products.  
**81** It does not apply to any natural or legal person that provides financial institutions solely with message or other support systems for transmitting funds. See the Interpretive Note to Recommendation 16.
5. Issuing and managing means of payment (e.g., credit and debit cards, cheques, traveller's cheques, money orders and bankers' drafts, electronic money).

6. Financial guarantees and commitments.

7. Trading in:
   (a) money market instruments (cheques, bills, certificates of deposit, derivatives etc.);
   (b) foreign exchange;
   (c) exchange, interest rate and index instruments;
   (d) transferable securities;
   (e) commodity futures trading.

8. Participation in securities issues and the provision of financial services related to such issues.

10. Safekeeping and administration of cash or liquid securities on behalf of other persons.

11. Otherwise investing, administering or managing funds or money on behalf of other persons.

12. Underwriting and placement of life insurance and other investment related insurance.

**Foreign counterparts**

Foreign counterparts refers to foreign competent authorities that exercise similar responsibilities and functions in relation to the co-operation which is sought, even where such foreign competent authorities have a different nature or status (e.g., depending on the country, AML/CFT supervision of certain financial sectors may be performed by a supervisor that also has prudential supervisory responsibilities or by a supervisory unit of the FIU).

**Freeze**

In the context of confiscation and provisional measures (e.g., Recommendations 4, 32 and 38), the term freeze means to prohibit the transfer, conversion, disposition or movement of any property, equipment or other instrumentalities on the basis of, and for the duration of the validity of, an action initiated by a competent authority or a court under a freezing mechanism, or until a forfeiture or confiscation determination is made by a competent authority.

For the purposes of Recommendations 6 and 7 on the implementation of targeted financial sanctions, the term freeze means to prohibit the transfer, conversion, disposition or movement of any funds or other assets that are owned or controlled by designated persons or entities on the basis of, and for the duration of the validity of, an action initiated by the United Nations Security Council.

---

82 This applies both to insurance undertakings and to insurance intermediaries (agents and brokers).

<tr>
<td>Reasonable measures</td>
<td>The term <em>Reasonable Measures</em> means: appropriate measures which are commensurate with the money laundering or terrorist financing risks.</td>
</tr>
<tr>
<td>Related to terrorist financing or money laundering</td>
<td>When used to describe currency or BNIs, refers to currency or BNIs that are: (i) the proceeds of, or used in, or intended or allocated for use in, the financing of terrorism, terrorist acts or terrorist organisations; or (ii) laundered, proceeds from money laundering or predicate offences, or instrumentalities used in or intended for use in the commission of these offences.</td>
</tr>
<tr>
<td>Required</td>
<td>Is used to describe a situation in which all elements of required information are present. Subparagraphs 6(a), 6(b) and 6(c) set out the <em>required originator information</em>. Subparagraphs 6(d) and 6(e) set out the <em>required beneficiary information</em>.</td>
</tr>
<tr>
<td>Risk</td>
<td>All references to <em>risk</em> refer to the risk of money laundering and/or terrorist financing. This term should be read in conjunction with the Interpretive Note to Recommendation 1.</td>
</tr>
<tr>
<td>Satisfied</td>
<td>Where reference is made to a financial institution being <em>satisfied</em> as to a matter, that institution must be able to justify its assessment to competent authorities.</td>
</tr>
<tr>
<td>Seize</td>
<td>The term <em>seize</em> means to prohibit the transfer, conversion, disposition or movement of property on the basis of an action initiated by a competent authority or a court under a freezing mechanism. However, unlike a freezing action, a seizure is effected by a mechanism that allows the competent authority or court to take control of specified property. The seized property remains the property of the natural or legal person(s) that holds an interest in the specified property at the time of the seizure, although the competent authority or court will often take over possession, administration or management of the seized property.</td>
</tr>
<tr>
<td>Self-regulatory body (SRB)</td>
<td>A SRB is a body that represents a profession (<em>e.g.</em>, lawyers, notaries, other independent legal professionals or accountants), and which is made up of members from the profession, has a role in regulating the persons that are qualified to enter and who practise in the profession, and also performs certain supervisory or monitoring type functions. Such bodies should enforce rules to</td>

</table>
ensure that high ethical and moral standards are maintained by those practising the profession.

**Serial Payment**
Refers to a direct sequential chain of payment where the wire transfer and accompanying payment message travel together from the ordering financial institution to the beneficiary financial institution directly or through one or more intermediary financial institutions (e.g., correspondent banks).

**Settlor**
*Settlors are natural or legal persons who transfer ownership of their assets to trustees by means of a trust deed or similar arrangement.*

**Shell bank**
*Shell bank means a bank that has no physical presence in the country in which it is incorporated and licensed, and which is unaffiliated with a regulated financial group that is subject to effective consolidated supervision.*

*Physical presence means meaningful mind and management located within a country. The existence simply of a local agent or low level staff does not constitute physical presence.*

**Should**
*For the purposes of assessing compliance with the FATF Recommendations, the word *should* has the same meaning as *must.**

**Straight-through processing**
*Refers to payment transactions that are conducted electronically without the need for manual intervention.*

**Supervisors**
*Supervisors refers to the designated competent authorities or non-public bodies with responsibilities aimed at ensuring compliance by financial institutions ("financial supervisors" 83) and/or DNFBPs with requirements to combat money laundering and terrorist financing. Non-public bodies (which could include certain types of SRBs 84) should have the power to supervise and sanction financial institutions or DNFBPs in relation to the AML/CFT requirements. These non-public bodies should also be empowered by law to exercise the functions they perform, and be supervised by a competent authority in relation to such functions.*

**Targeted financial sanctions**
The term *targeted financial sanctions* means both asset freezing and prohibitions to prevent funds or other assets from being made available, directly or indirectly, for the benefit of designated persons and entities.

**Terrorist**
The term *terrorist* refers to any natural person who: (i) commits, or attempts to commit, terrorist acts by any means, directly or indirectly, unlawfully and wilfully; (ii) participates as an accomplice in terrorist acts; (iii) organises or directs others to commit terrorist acts; or (iv) contributes to the commission of terrorist acts by a group of persons acting with a common purpose where the contribution is made intentionally and with the aim of furthering the terrorist

83 Including Core Principles supervisors who carry out supervisory functions that are related to the implementation of the FATF Recommendations.

84 For the purposes of the effectiveness assessment, “supervisors” includes SRBs.

<tr>
<td>Trustee</td>
<td>The terms trust and trustee should be understood as described in and consistent with Article 2 of the Hague Convention on the law applicable to trusts and their recognition(^85). Trustees may be professional (e.g., depending on the jurisdiction, a lawyer or trust company) if they are paid to act as a trustee in the course of their business, or non-professional (e.g., a person acting without reward on behalf of family).</td>
</tr>
<tr>
<td>Unique transaction reference number</td>
<td>Refers to a combination of letters, numbers or symbols, determined by the payment service provider, in accordance with the protocols of the payment and settlement system or messaging system used for the wire transfer.</td>
</tr>
<tr>
<td>Without delay</td>
<td>The phrase without delay means, ideally, within a matter of hours of a designation by the United Nations Security Council or its relevant Sanctions Committee (e.g., the 1267 Committee, the 1988 Committee, the 1718 Sanctions Committee or the 1737 Sanctions Committee). For the purposes of S/RES/1373(2001), the phrase without delay means upon having reasonable grounds, or a reasonable basis, to suspect or believe that a person or entity is a terrorist, one who finances terrorism or a terrorist organisation. In both cases, the phrase without delay should be interpreted in the context of the need to prevent the flight or dissipation of funds or other assets which are linked to terrorists, terrorist organisations, those who finance terrorism, and to the financing of proliferation of weapons of mass destruction, and the need for global, concerted action to interdict and disrupt their flow swiftly.</td>
</tr>

---

\(^85\) Article 2 of the Hague Convention reads as follows:

For the purposes of this Convention, the term "trust" refers to the legal relationships created - inter-vivos or on death - by a person, the settlor, when assets have been placed under the control of a trustee for the benefit of a beneficiary or for a specified purpose.

A trust has the following characteristics -

a) the assets constitute a separate fund and are not a part of the trustee’s own estate;

b) title to the trust assets stands in the name of the trustee or in the name of another person on behalf of the trustee;

c) the trustee has the power and the duty, in respect of which he is accountable, to manage, employ or dispose of the assets in accordance with the terms of the trust and the special duties imposed upon him by law.

The reservation by the settlor of certain rights and powers, and the fact that the trustee may himself have rights as a beneficiary, are not necessarily inconsistent with the existence of a trust.
