High-risk and non-cooperative jurisdictions

IMPROVING GLOBAL AML/CFT COMPLIANCE: ON-GOING PROCESS - 27 June 2014

Paris, 27 June 2014 - As part of its on-going review of compliance with the AML/CFT standards, the FATF has to date identified the following jurisdictions which have strategic AML/CFT deficiencies for which they have developed an action plan with the FATF. While the situations differ among each jurisdiction, each jurisdiction has provided a written high-level political commitment to address the identified deficiencies. The FATF welcomes these commitments.

A large number of jurisdictions have not yet been reviewed by the FATF. The FATF continues to identify additional jurisdictions, on an on-going basis, that pose a risk to the international financial system.

The FATF and the FATF-style regional bodies (FSRBs) will continue to work with the jurisdictions noted below and to report on the progress made in addressing the identified deficiencies. The FATF calls on these jurisdictions to complete the implementation of action plans expeditiously and within the proposed timeframes. The FATF will closely monitor the implementation of these action plans and encourages its members to consider the information presented below.

Afghanistan

In June 2012, Afghanistan made a high-level political commitment to work with the FATF and APG to address its strategic AML/CFT deficiencies. Since then, Afghanistan has taken steps towards improving its AML/CFT regime, including by passing new AML and CFT laws in June 2014. While the AML law has been enacted, the FATF has not yet assessed it due to its very recent nature. In addition, it is not clear whether the CFT law is in force, and Afghanistan has not issued the necessary CFT regulations. If Afghanistan does not bring into force CFT legislation and issue the necessary regulations compliant with the international standards by the October 2014 FATF meetings, the FATF will call upon its members and other jurisdictions to consider the ML/TF risks arising from the deficiencies in Afghanistan. Afghanistan should continue to work on implementing its action plan to address its strategic AML/CFT deficiencies, including by: (1) adequately criminalising money laundering and terrorist financing; (2) establishing and implementing an adequate legal framework for identifying, tracing and freezing terrorist assets; (3) implementing an adequate AML/CFT supervisory and oversight programme for all financial sectors; (4) establishing and implementing adequate procedures for the confiscation of assets related to money laundering; (5) establishing a fully operational and effectively functioning Financial Intelligence Unit; and (6) establishing and implementing effective controls for cross-border cash transactions. The FATF encourages Albania to address its remaining deficiencies and continue the process of implementing its action plan.
